Sphere 44:

Domestic Individualism Gillian Brown, 1992-09-30 Gillian Brown's book probes the key relationship between domestic ideology and formulations of the self in nineteenth century America. Arguing that domesticity institutes gender class and racial distinctions that govern masculine as well as feminine identity, Brown brilliantly alters for literary critics, feminists, and cultural historians the critical perspective from which nineteenth century American literature and culture have been viewed. In this study of the domestic constitution of individualism, Brown traces how the values of interiority, order, privacy, and enclosure associated with the American home come to define selfhood in general. By analyzing writings by Stowe, Hawthorne, Melville, Fern, and Gilman, and by examining other contemporary cultural modes (abolitionism, consumerism, architecture, interior decorating, motherhood, mesmerism, hysteria, and agoraphobia), she reconfigures the parameters of both domesticity and the patterns of self it fashions. Unfolding a representational history of the domestic, Brown's work offers striking new readings of the literary texts as well as of the cultural contexts that they embody. *From Sex Objects to Sexual Subjects* Claudia Moscovici, 2020-11-25 *From Sex Objects to Sexual Subjects* traces some of the ruptures and continuities between the eighteenth century masculinist formulations of subjectivity elaborated by Rousseau, Diderot, and Kant, and the contemporary postmodern and feminist critiques of the universal subject, meaning the self viewed as an abstract individual who exercises an impartial and rational political judgment that is identical to other similarly defined individuals developed by Luce Irigaray, Francois Lyotard, Jacques Derrida, Jurgen Habermas, Nancy, Fraser, Judith Butler, and Michel Foucault. In her work, Moscovici brings together the wide ranging discussion of subjectivity with debates about public discourse. In so doing, she attempts a synthesis between the two discussions that have recently engaged feminist theorists and others. Archives and Records Mikuláš Čtvrtník, 2023 This open access book addresses the protection of privacy and personality rights in public records, records management, historical sources, and archives, and historical and current access to them in a broad international comparative perspective. Considering the question can archiving pose a security risk to the protection of sensitive data and human rights, it analyses data security and presents several significant cases of the misuse of sensitive personal data such as census data or medical records. It examines archival inflation and the minimisation and reduction of data in public records and archives, including data anonymisation and pseudonymisation, and the risks of deanonymisation and reidentification of persons. The book looks at post mortem privacy protection, the relationship of the right to know and the right to be forgotten, and introduces a specific model of four categories of the right to be forgotten. In its conclusion, the book presents a set of recommendations for archives and records management. Mikulas Ctvrtnik, Ph.D., visiting assistant professor at Charles University in Prague and assistant professor at Jan Evangelista Purkyně University in Ústí nad Labem. Author of several monographs including *Geschichte der Geschichtswissenschaft: Der tschechische Historiker Zdenek Kalista und die Tradition der deutschen Geistesgeschichte* published in Germany, his latest book discusses intellectual history in the context of

European historiography of the 19th and 20th centuries **The Trauma of Gender** Helene Moglen,2001-02-15 Helene Moglen offers a revisionary feminist argument about the origins cultural function and formal structure of the English novel While most critics and historians have associated the novel s emergence and development with the burgeoning of capitalism and the rise of the middle classes Moglen contends that the novel principally came into being in order to manage the social and psychological strains of the modern sex gender system Rejecting the familiar claim that realism represents the novel s dominant tradition she shows that from its inception in the eighteenth century the English novel has contained both realistic and fantastic narratives which compete for primacy within individual texts **Tough Choices** Sigal R. Ben-Porath,2016-06-28 To what extent should government be permitted to intervene in personal choices In grappling with this question liberal theory seeks to balance individual liberty with the advancement of collective goals such as equality Too often however society s obligation to provide meaningful opportunities is overshadowed by its commitment to personal freedom Tough Choices charts a middle course between freedom oriented anti interventionism and equality oriented social welfare presenting a way to structure choices that equalize opportunities while protecting the freedom of individuals to choose among them Drawing on insights from behavioral economics psychology and educational theory Sigal Ben Porath makes the case for structured paternalism which is based on the understanding that state intervention is often inevitable and that therefore theorists and policymakers must focus on the extent to which it can productively be applied as well as on the forms it should take in different social domains Ben Porath explores how structured paternalism can play a role in providing equal opportunities for individual choice in an array of personal and social contexts including the intimate lives of adults parent child relationships school choice and intercultural relations Tough Choices demonstrates how structured paternalism can inform more egalitarian social policies ones that acknowledge personal social and cultural differences as well as the challenges all individuals may face when they make a choice [A Color Notation](#) Albert Henry Munsell,1905 **Art in Public** Lambert Zuidervart,2010-11-15 This book examines fundamental questions about funding for the arts why should governments provide funding for the arts What do the arts contribute to daily life Do artists and their publics have a social responsibility Challenging questionable assumptions about the state the arts and a democratic society Lambert Zuidervart presents a vigorous case for government funding based on crucial contributions the arts make to civil society He argues that the arts contribute to democratic communication and a social economy fostering the critical and creative dialogue that a democratic society needs Informed by the author s experience leading a non profit arts organisation as well as his expertise in the arts humanities and social sciences this book proposes an entirely new conception of the public role of art with wide ranging implications for education politics and cultural policy *Groups* R. P. Burn,1987-09-03 Following the same successful approach as Dr Burn s previous book on number theory this text consists of a carefully constructed sequence of questions that will enable the reader through participation to study all the group theory covered by a conventional first

university course An introduction to vector spaces leading to the study of linear groups and an introduction to complex numbers leading to the study of Möbius transformations and stereographic projection are also included Quaternions and their relationships to 3 dimensional isometries are covered and the climax of the book is a study of the crystallographic groups with a complete analysis of these groups in two dimensions **International Library of Technology**, 1903 **Imaging**

Acute Neurologic Disease Massimo Filippi, Jack H. Simon, 2014-09-11 While conventional magnetic resonance X ray based ultrasound and nuclear medicine techniques are widely used to facilitate diagnosis inform therapeutic decision making provide information regarding prognosis and monitor therapeutic response in neurologic diseases their practical value in acute clinical care is not as yet well defined and the potential future development is not fully appreciated This book provides a comprehensive survey of best practice for specialists and trainees in neurology emergency medicine neuroradiology radiology neurosurgery and critical care The symptom based approach guides the choice of the available imaging tools for efficient accurate and cost effective diagnosis to support immediate management of common and complex neurological disorders in the acute setting Effective examination algorithms are included that integrate neurological and imaging concepts with the practical demands and constraints of emergency care Written by leading international authorities the book is extensively illustrated and contains many helpful case histories *Imagination in Politics* Mihaela

Czobor-Lupp, 2014-10-15 Imagination is a complex and ambiguous culture making power which while central to politics is a rather marginal concept in contemporary political theory By drawing on works of modern and contemporary Continental political philosophers this book addresses how imagination can be both a source of freedom and domination in liberal democratic politics and argues for a benign public employment of images and narratives in a global world of diverse cultures The challenge is not to keep contemporary politics clear of images but to better distinguish between benign and malign uses of creativity in the public realm This distinction is important because the language employed by the participants in the complex cultural dialogue that characterizes modern plural societies is constituted by metaphors and myths which form their perceptions and sensibilities The embedment of communicative practices in a society's imaginary brings an ambivalent psychological and emotional potential into democratic politics Modern liberal democracies can shift the public employment of imagination either in a direction that increases the autonomous capacity of individuals to engage culture and language in a creative and interactive manner in the construction of their identities or in a direction that increases fascination with images and myths and consequently the escapist desire to pull these out of the living dialogue with others Turning the public work of creativity in the first direction requires a conscious change in the modern social imaginary This can be achieved through the aesthetic cultivation of an ethical productive imagination both analogical and explorative both empathic and reflective While capable of creatively giving utopian impetus to politics this imagination would also stir the individuals responsiveness to the particularity of others and to their capacity to be equal and free partners in the making of a common world An important

avenue in achieving this objective in modern liberal democracies will be provided by the capacity of literary works to open up public spaces of dialogue There the renewal of the metaphors and myths that frame individual and collective identities in a society can have transformative effects that increase the individuals ability for cross cultural understanding **Proceedings [of The] Annual Business Meeting** State Historical Society of Wisconsin,1904 *The American Bookseller* ,1890 A Treatise on Elementary Geometry William Chauvenet,1871 **Internet Protocol-based Emergency Services** Henning Schulzrinne,Hannes Tschofenig,2013-08-19 Written by international experts in the field this book covers the standards architecture and deployment issues related to IP based emergency services This book brings together contributions from experts on technical and operational aspects within the international standardisation and regulatory processes relating to routing and handling of IP based emergency calls Readers will learn how these standards work how various standardization organizations contributed to them and about pilot projects early deployment and current regulatory situation Key Features Provides an overview of how the standards related to IP based emergency services work and how various organizations contributed to them Focuses on SIP and IMS based communication systems for the Internet Covers standards architecture and deployment issues International focus with coverage of the major national efforts in this area Written by the experts who were are involved in the development of the standards NENA EENA 3GPP IETF ETSI etc Accompanying website provides updates on standards and deployment <http://ip-emergency.net> This book is an excellent resource for vendors building software and equipment for emergency services engineers researchers engaged in development of networks and network elements and standardization emergency services providers standardization experts product persons those within the regulatory environment Students and lecturers infrastructure and application service providers will also find this book of interest

Until Choice Do Us Part Clare Virginia Eby,2014-01-06 For centuries people have been thinking and writing and fiercely debating about the meaning of marriage Just a hundred years ago Progressive era reformers embraced marriage not as a time honored repository for conservative values but as a tool for social change In *Until Choice Do Us Part* Clare Virginia Eby offers a new account of marriage as it appeared in fiction journalism legal decisions scholarly work and private correspondence at the turn into the twentieth century She begins with reformers like sexologist Havelock Ellis anthropologist Elsie Clews Parsons and feminist Charlotte Perkins Gilman who argued that spouses should be class equals joined by private affection not public sanction Then Eby guides us through the stories of three literary couples Upton and Meta Fuller Sinclair Theodore and Sara White Dreiser and Neith Boyce and Hutchins Hapgood who sought to reform marriage in their lives and in their writings with mixed results With this focus on the intimate side of married life Eby views a historical moment that changed the nature of American marriage and that continues to shape marital norms today *Problems in Classical Electromagnetism* Andrea Macchi,Giovanni Moruzzi,Francesco Pegoraro,2023-05-29 This second edition adds 46 new problems for a total of 203 The solutions to certain old problems have been revised for improved clarity in response to

questions and comments from our students second year students in the Master s in Physics program Each problem is given a title indicating its relation to the various areas of physics or technology By tackling the problems presented here students are gently introduced to advanced topics such as unipolar and homopolar motors magnetic monopoles radiation pressure angular momentum of light bulk and surface plasmons and radiation friction We also address a number of tricky concepts and apparent ambiguities and paradoxes encountered in the classical theory of electromagnetism with a particular focus on conservation laws and transformation properties between different frames of reference At the same time the book can be used as an introduction to applications of classical electromagnetism including cutting edge topics like plasmonics metamaterials and light driven propulsion While unnecessary mathematical complexity is avoided the new edition also provides a few introductory examples concerning elegant and powerful solution techniques Hopefully the second edition offers an even better teaching tool for undergraduates in physics mathematics and electric engineering and a valuable reference guide for students planning to work in optics material science electronics and plasma physics

Handbook of Quantum Gravity Cosimo Bambi,Leonardo Modesto,Ilya Shapiro,2025-04-17 The search for a theory of quantum gravity is one of the most important and fascinating problems in modern theoretical physics While we do not have yet a complete theory of quantum gravity significant advancements have been done in the past decades In this handbook every section is dedicated to a specific approach towards a theory of quantum gravity and is edited by the leading experts in the field This book represents both a valuable resource for graduate students and an important reference for researchers in quantum gravity

Law from the Tigris to the Tiber Raymond Westbrook,2009-06-23 Raymond Westbrook 1946 2009 was acknowledged by many as the world s foremost expert on the legal systems of the ancient Near East and a leading scholar in the study of biblical and classical law This collection brings together the 44 most important articles that Westbrook published in the 25 years following the completion of his Ph D at Yale University in 1982 The first volume The Shared Tradition contains 16 articles that lay out Westbrook s theory of a common legal tradition that spanned the ancient world from Mesopotamia to Israel and even to Greece and Rome The second volume Cuneiform and Biblical Sources provides 28 articles that demonstrate Westbrook s unique method of legal analysis that he applied to the numerous texts he worked with as an Assyriologist and biblical scholar from law codes to contracts to narratives Each volume contains its own comprehensive bibliography as well as subject author and text indexes Together they represent the life s work of one of the most important legal historians of our era
