*Handbook of Inviscid Sphere-cone Flow Fields and Pressure Distributions* Alfred Merle Morrison, Solomon, J. M., Ciment, M., Ferguson, R. E., 1975 This report contains numerical tables of aerodynamic coefficients and surface pressure distributions for sphere cone configurations as a function of angle of attack and Mach number These results were generated by an NSWC WOL computer code based on a finite difference solution of the steady inviscid three dimensional compressible flow equation for a perfect gas  $\gamma = 1.4$  Cone half angles of 50 60 80 90 100 150 and 200 are considered Truncated values are obtained at axial stations to a length of 200 times the sphere radius over a Mach number range of 3 5 5 10 20 25 and 30 for an angle of attack span of 10 30 50 and 100 Center of pressure location and axial and normal force coefficients are tabularly presented at each axial length increment station Surface pressure distributions are also presented at each axial length increment station including seven meridian plane angles over the half plane from windward to leeward ray The techniques utilized in generating the tables are described and comparisons between computed values and values measured in some wind tunnel experiments are presented The presentation format is discussed to establish the mechanics necessary to use the tables The tables are divided into two volumes the first containing pressure information and the second aerodynamic information

Complex Cobordism and Stable Homotopy Groups of Spheres Douglas C. Ravenel, 2003-11-25 Since the publication of its first edition this book has served as one of the few available on the classical Adams spectral sequence and is the best account on the Adams Novikov spectral sequence This new edition has been updated in many places especially the final chapter which has been completely rewritten with an eye toward future research in the field It remains the definitive reference on the stable homotopy groups of spheres The first three chapters introduce the homotopy groups of spheres and take the reader from the classical results in the field though the computational aspects of the classical Adams spectral sequence and its modifications which are the main tools topologists have to investigate the homotopy groups of spheres Nowadays the most efficient tools are the Brown Peterson theory the Adams Novikov spectral sequence and the chromatic spectral sequence a device for analyzing the global structure of the stable homotopy groups of spheres and relating them to the cohomology of the Morava stabilizer groups These topics are described in detail in Chapters 4 to 6 The revamped Chapter 7 is the computational payoff of the book yielding a lot of information about the stable homotopy group of spheres Appendices follow giving self contained accounts of the theory of formal group laws and the homological algebra associated with Hopf algebras and Hopf algebroids The book is intended for anyone wishing to study computational stable homotopy theory It is accessible to graduate students with a knowledge of algebraic topology and recommended to anyone wishing to venture into the frontiers of the subject

**Dancing Around the Elephant** Bruce Muirhead,2007-01-01 A generation of Canadian historians has viewed the mid twentieth century as an era when Canada gave ground to the United States in most areas of foreign trade policy In Dancing around the Elephant Bruce Muirhead elegantly and cogently disputes this view Drawing on extensive archival research Muirhead notes a number of cases where Canadian policy makers actually got the better of their American counterparts such as the Auto Pact and examines contextual reasons for the pessimistic view of Canada s trade position and hostile scepticism of American dominance the rise of Canadian nationalism the growth of anti Americanism based largely on the American role in Vietnam and the election of Pierre Elliot Trudeau as prime minister in 1968 Muirhead also dispels the myth that the poor relationship between Prime Minister John Diefenbaker and President John F Kennedy served to wreak havoc on Canadian American relations clearly demonstrating its lack of effect on trade patterns While not disregarding a number of trade failures particularly with the United Kingdom and Europe Dancing around the Elephant refutes the position of those who question Canada s economic independence in the mid century and will prove tremendously

**Inorganic Reaction Mechanisms** A. McAuley,1979 Annotation Specialist Periodical Reports provide systematic and  
detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the  
series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in  
particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have  
been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by  
1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical  
Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes  
covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a  
must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry  
Some titles have remained unchanged while others have altered their emphasis along with their titles some have been  
combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can
