

Distant fishing scorecard: **FAIL**

Current status of distant waters negotiations for 2021 Report: **Still no distant waters fishing for UK fleet**

Distant fishing ground:	Norway	Svalbard	Faroes	Greenland	Iceland
UK Gov't Score:					
Status:					
Last year 2020	<p>UK fished these waters last year Norway granted the EU rights to fish for Arctic Cod. EU passed most of those quotas to UK. In return Norway accessed EU markets (for UK) to sell its main seafood exports - cod and salmon to the UK for zero tariff</p>	<p>UK fished these waters last year UK share was set by EU - despite UK being an independent party in the Svalbard Treaty of Paris. Both the EU and Norway proposed quota levels for the UK for 2021, but the UK has yet to finalize its response.</p>	<p>UK fished these waters last year Faroes granted the EU rights to fish in Faroese waters. EU passed some of those rights to UK. Faroes accessed EU market (for UK) to sell its main exports - whitefish to the UK for zero tariff.</p>	<p>UK fished these waters last year Greenland granted the EU rights to fish in Greenland waters. EU passed some of those rights to UK. In return, Greenland can access EU market (for UK) to sell its main exports - prawns to UK for zero tariff.</p>	<p>UK last fished these waters in 2008 Iceland grants no rights to UK to fish in its waters. The UK last fished there in 2008 but not in any substantial way since the Cod Wars. Iceland accessed EU market (for UK) to sell its main exports - cod to UK for zero tariff</p>
Now 2021	No arrangements in place for UK to fish for Arctic cod in 2021.	UK has issued a partial license.	No arrangements in place for UK to continue to fish in 2021.	No arrangements in place for UK to continue to fish in 2021. No UK plans to negotiate this.	No arrangements. No ability for UK to fish in 2021. No plans in place to open discussions
What's required	UK government must agree continued UK fishing for Arctic Cod in bilateral deals with Norway. Norway wants zero-tariff access to UK to sell fish. Needs urgent negotiations.	UK government must set full annual quotas and issue licenses for the full year immediately.	UK government must agree continued UK fishing in bilateral deals with Faroes. Negotiations have started.	UK government must agree continued UK fishing in bilateral deals with Greenland. Open negotiations now.	UK government must agree new UK fishing in bilateral deals with Iceland. Open negotiations now.
When	New. Deals has made a Fisheries framework agreement, but it makes no reference to UK's Arctic Cod quotas. UK is meeting EU and Norway in trilogue. Will Arctic cod be discussed?	New. The UK has latitude to make its own plans (in cooperation with others such as EU, Russia, Norway and Japan). It can make full year plans today.	New. Deals has fisheries framework agreement with Faroes, but it makes no detailed reference to UK fishing quotas.	New. Greenland PM has said that he is willing to give continued UK fishing access in return for trade. But the new Fisheries MOU grants no access.	New. There is on-going FTA negotiation with Iceland. New Fisheries MOU makes no reference to Fisheries access or negotiations.

Class Paul Fussell,1992 This book describes the living room artifacts clothing styles and intellectual proclivities of American classes from top to bottom *Environmental DNA* Pierre Taberlet,Aurélie Bonin,Lucie Zinger,Eric Coissac,2018-02-02 Environmental DNA eDNA refers to DNA that can be extracted from environmental samples such as soil water feces or air without the prior isolation of any target organism The analysis of environmental DNA has the potential of providing high throughput information on taxa and functional genes in a given environment and is easily amenable to the study of both aquatic and terrestrial ecosystems It can provide an understanding of past or present biological communities as well as their trophic relationships and can thus offer useful insights into ecosystem functioning There is now a rapidly growing interest amongst biologists in applying analysis of environmental DNA to their own research However good practices and protocols dealing with environmental DNA are currently widely dispersed across numerous papers with many of them presenting only preliminary results and using a diversity of methods In this context the principal objective of this practical handbook is to provide biologists both students and researchers with the scientific background necessary to assist with the understanding and implementation of best practices and analyses based on environmental DNA **A Treatise on the Modern Law of Evidence: Media of proof** Charles Frederic Chamberlayne,1916 **Yearbook of International Organizations** ,1989 Gale Directory of Publications and Broadcast Media ,2006 Identifies specific print and broadcast sources of news and advertising for trade business labor and professionals Arrangement is geographic with a thumbnail description of each local market Indexes are classified by format and subject matter and alphabetical by name and keyword

Sensors are being utilized to increasing degrees in all forms of industry Researchers and industrial practitioners in all fields seek to obtain a better understanding of appropriate processes so as to improve quality of service and efficiency The quality of water is no exception and the water industry is faced with a wide array of water quality issues being present world wide Thus the need for sensors to tackle this diverse subject is paramount The aim of this book is to combine for the first time international expertise in the area of water quality monitoring using smart sensors and systems in order that a better understanding of the challenges faced and solutions posed may be available to all in a single text

Climate change: Unpacking the burden on food safety Food and Agriculture Organization of the United Nations ,2020-03-01

Climate change is causing unprecedented damage to our ecosystem Increasing temperatures ocean warming and acidification severe droughts wildfires altered precipitation patterns melting glaciers rising sea levels and amplification of extreme weather events have direct implications for our food systems While the impacts of such environmental factors on food security are well known the effects on food safety receive less attention The purpose of Climate change Unpacking the burden on food safety is to identify and attempt to quantify some current and anticipated food safety issues that are associated with climate change The food safety hazards considered in the publication are foodborne pathogens and parasites harmful algal blooms pesticides mycotoxins and heavy metals with emphasis on methylmercury There is also a dedicated section on the benefits of forward looking approaches such as horizon scanning and foresight which will not only aid in anticipating future challenges in a shifting global food safety landscape but also help build resilient food systems that can be continually updated as more knowledge is assimilated By building a more widespread and better understanding of the consequences climate change has on food safety it is hoped that this document will aid in fostering stronger international cooperation in making our food safer by reducing the global burden of these concerns
