Concepts pivot discusses the contemporary relevance of the ancient Chinese concept of Tianxia or All Under Heaven and
argues the case for a new global political philosophy All under heaven is a conceptualization of the world as the composition
of three realms the physical psychological and political which places inclusivity and harmony at the heart of a global world
view above other considerations transcending the notion of nation state In a highly interconnected and globalized world the
idea of Tianxia can offer a new 21st century vision of international relations and world order based on a harmonized global
organization defined by the all inclusiveness principle Promoting the ontology of co existence and relational rationality hand
in hand with rational risk aversion in a globalized world this pivot makes the case that Tianxia could offer a new vision for
