overview of current space exploration in terms of geopolitical and commercial aspects Despite multiple attempts to foster
commercial activities in the field of space exploration for decades the domain largely continued to be funded and led by
governments in the form of national and international programmes However the situation changed with the retirement of the
Space Shuttle and the introduction of NASA s Commercial Orbital Transportation Services COTS programme which
employed an innovative procurement scheme based on competitive performance based fixed price milestones The success of
this programme marked an important milestone in the evolution of the relationship between government and industry The
growing opportunities for private actors to make more prominent contributions to space exploration also lie in the New
Space ecosystem a sectoral transformation characterised by a substantial increase in private investment and the emergence
of commercial efforts to develop disruptive concepts and address new markets *Monthly Catalogue, United States Public*
