Jaguar XJS takes the reader through the 20-year history of a model series which, after a lukewarm reception in 1975 by Jaguar enthusiasts who expected a replacement for the famed E-Type, matured through many evolutions into some of the most stylish cars ever to wear the Jaguar badge, earning along the way an enviable reputation on the international motor racing scene.

Star Power Alain Bécoulet 2022-03-01 A concise and accessible explanation of the science and technology behind the domestication of nuclear fusion energy. Nuclear fusion research tells us that the Sun uses one gram of hydrogen to make as much energy as can be obtained by burning eight tons of petroleum. If nuclear fusion—the process that makes the stars shine—could be domesticated for commercial energy production, the world would gain an inexhaustible source of energy that neither depletes natural resources nor produces greenhouse gases. In Star Power, Alan Bécoulet offers a concise and accessible primer on fusion energy, explaining the science and technology of nuclear fusion and describing the massive international scientific effort to achieve commercially viable fusion energy. Bécoulet draws on his work as Head of Engineering at ITER (International Thermonuclear Experimental Reactor) to explain how scientists are trying to “put the sun in a box.” He surveys the history of nuclear power, beginning with post–World War II efforts to use atoms for peaceful purposes and describes how energy is derived from fusion, explaining that the essential principle of fusion is based on the capacity of nucleons (protons and neutrons) to assemble and form

structures (atomic nuclei) in spite of electrical repulsion between protons, which all have a positive charge. He traces the evolution of fusion research and development, mapping the generation of electric current through fusion. The ITER project marks a giant step in the development of fusion energy, with the potential to demonstrate the feasibility of a nuclear fusion reactor. Star Power offers an introduction to what may be the future of energy production.

Bringing Fusion to the U.S. Grid National Academies of Sciences Engineering and Medicine 2021-11-17 Fusion energy offers the prospect of addressing the nation's energy needs and contributing to the transition to a low-carbon emission electrical generation infrastructure. Technology and research results from U.S. investments in the major fusion burning plasma experiment known as ITER, coupled with a strong foundation of research funded by the Department of Energy (DOE), position the United States to begin planning for its first fusion pilot plant. Strong interest from the private sector is an additional motivating factor, as the process of decarbonizing and modernizing the nation's electric infrastructure accelerates and companies seek to lead the way. At the request of DOE, Bringing Fusion to the U.S. Grid builds upon the work of the 2019 report Final Report of the Committee on a Strategic Plan for U.S. Burning Plasma Research to identify the key goals and innovations - independent of confinement concept - that are needed to support the development of a U.S. fusion pilot plant that can serve as a model for producing electricity at the lowest possible capital cost.

Working in the Wild: Land Rover's Manual for Africa Rover Group Ltd 2003-07-01 Working in the Wild: Land Rover's Manual for Africa is designed to equip Land Rover users with the practical know-how it takes to make the most of the vehicle's capacity for hard work in hostile conditions. The aim of the authors has been to produce a no-nonsense guide which can be used by virtually anyone to keep a Land Rover running to maximum efficiency and effect almost anywhere on Earth. It is based upon the in-depth operating experience of Land Rover engineers and users throughout the world over many years. The book looks at every stage of the working life of a Land Rover - the selection and purchasing of the right kind of Land Rover - how to drive it to maximum effect - how to look after it away from conventional workshops - how to avoid problems - how to overcome unavoidable difficulties - and much more. It has been welcomed by international agencies and specialists who themselves have faced the conditions and situations for which it offers advice.

Sounding Sensory Profiles in the Ancient Near East Annette Schellenberg 2019 "For several decades sociologists and cultural anthropologists have intensively researched the role of the senses in a variety of cultures, and their studies reveal how different cultures understand and evaluate the five or more senses in unique ways. In this collection of eighteen essays, biblical and ancient Near Eastern scholars apply the questions and methods raised by cultural anthropologists to Israel, Mesopotamia, and Egypt. Experts offer insights into the meaning of the senses in ancient texts and images, examining the classical senses (seeing, hearing, touching, smelling, tasting) as well as other senses (such as kinesthesia and the sense of balance) and sense-related issues (such as disgust, sensory imagination, and disabilities)."

Handbook of Human Factors and Ergonomics Methods Neville Anthony Stanton 2004-08-30 Research suggests that ergonomists tend to restrict themselves to two or three of their favorite methods in the design of systems, despite a multitude of variations in the problems that they face. Human Factors and Ergonomics Methods delivers an authoritative and practical account of methods that incorporate human capabilities and limitations, envi

Conservation Research in Libraries David Howell 2020-06-08 Conservation research in libraries is a rapidly growing field. This book places analysis within its context in conservation and provides examples of how this expensive resource can be used. Through a series of case studies, it describes major analytical procedures, including visualization, molecular, elemental and separation techniques as well as chemical tests. It is thus a suitable reference work for library conservators and curators. Please note: Despite careful production of our books, sometimes mistakes happen. Unfortunately, the authorship for some chapters wasn't correct in the original publication. Chapter 5 was written by Andrew Beeby and David Howell as co-author, chapter 6 by Kelly Domoney and David Howell as co-author, and chapter 9 is authored by Anita Quye. This will be corrected. We apologize for the mistake.
