Van Perlo's Endgame Tactics Ger van Perlo 2015-09-01 New and substantially expanded edition of a modern chess classic. By chance, in 2013 publisher New In Chess discovered a previously unnoticed and unpublished extra batch of endgame tactics collected by the legendary Dutch correspondence grandmaster Ger van Perlo (1932-2010). More than 250 fresh examples have been added, making this fourth edition 25% BIGGER than its predecessors. For casual players and club players. Why is it that most amateur chess players love opening and middlegame tactics but hate endgames? Why do you usually look at only a couple of pages in any endgame theory book you see? Sit back, forget about theoretical endgames, and enjoy the entertainment of real life chess in Endgame Tactics! There is no substitute for hard work in getting better at chess, as a wise grandmaster once said. But you always work harder at something you enjoy. Make the first step towards improving your endgame play (and beating more opponents) by learning to love the endgame. Endgames are fun, and the examples from everyday practice in Endgame Tactics prove it. • New (4th) and 25% expanded edition of a best-selling modern classic • More than 1,300 Sparkling Tricks and Traps • WINNER of the ECF Book of the Year Award • WINNER

Landscape-scale Conservation Planning Stephen C. Trombulak 2010-09-21 Hugh P. Possingham Landscape-
scale conservation planning is coming of age. In the last couple of decades, conservation practitioners, working
at all levels of governance and all spatial scales, have embraced the CARE principles of conservation planning –
Comprehensiveness, Adequacy, Representativeness, and Efficiency. Hundreds of papers have been written on
this theme, and several different kinds of software program have been developed and used around the world,
making conservation planning based on these principles global in its reach and influence. Does this mean that all
the science of conservation planning is over – that the discovery phase has been replaced by an engineering
phase as we move from defining the rules to implementing them in the landscape? This book and the continuing
growth in the literature suggest that the answer to this question is most definitely ‘no.’ All of applied conservation
can be wrapped up into a single sentence: what should be done (the action), in what place, at what time, using
what mechanism, and for what outcome (the objective). It all seems pretty simple – what, where, when, how and
why. However stating a problem does not mean it is easy to solve.

The Uninhabitable Earth David Wallace-Wells 2020 "It is worse, much worse, than you think. If your anxiety
about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what
terrors are possible. In California, wildfires now rage year-round, destroying thousands of homes. Across the US,

"500-year" storms pummel communities month after month, and floods displace tens of millions annually. This is only a preview of the changes to come. And they are coming fast. Without a revolution in how billions of humans conduct their lives, parts of the Earth could become close to uninhabitable, and other parts horrifically inhospitable, as soon as the end of this century. In his travelogue of our near future, David Wallace-Wells brings into stark relief the climate troubles that await -- food shortages, refugee emergencies, and other crises that will reshape the globe. But the world will be remade by warming in more profound ways as well, transforming our politics, our culture, our relationship to technology, and our sense of history. It will be all-encompassing, shaping and distorting nearly every aspect of human life as it is lived today. Like *An Inconvenient Truth* and *Silent Spring* before it, *The Uninhabitable Earth* is both a meditation on the devastation we have brought upon ourselves and an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation"--
