"Myne Owne Ground" T. H. Breen 2004 During the earliest decades of Virginia history, some men and women who arrived in the New World as slaves achieved freedom and formed a stable community on the Eastern shore. Holding their own with white neighbors for much of the 17th century, these free blacks purchased freedom for family members, amassed property, established plantations, and acquired laborers. T.H. Breen and Stephen Innes reconstruct a community in which ownership of property was as significant as skin color in structuring social relations. Why this model of social interaction in race relations did not survive makes this a critical and urgent work of history.

Cheyenne Plains Pipeline Project 2004

Beyond Forty Acres and a Mule Debra A. Reid 2014-03-01 “Provides a potent counter-narrative to the story of African Americans only as sharecroppers.

These richly documented essays add depth and complexity to the little-known story of African American landowners.”—Journal of American History “Serves

the discipline well in redirecting attention back to the land when examining African American life and culture. It also highlights the often-neglected

landowners of color as individuals worthy of close attention, despite their minority status within American culture.”—American Historical Review

“Presents the scope and complexity of landownership among black farmers following emancipation.”—Missouri Historical Review “Ground-breaking. The

essays offer a counterpoint to the standard story that all African Americans in the rural South found themselves mired in poverty and dependency.”—Melissa

Walker, author of *Southern Farmers and Their Stories* “Remarkable. The authors in this collection have retrieved African American farm owners from

the margins of history, making clear that life on the land for African Americans not only transcended sharecropping but also shaped the contours of the struggle for freedom and justice.”—Hasan Kwame Jeffries, author of *Bloody Lowndes*

The Hacker and the Ants Rudy Rucker 2009-07-21 From a two-time winner of the Philip K. Dick award, and one of the founding fathers of cyberpunk comes a novel about a very modern nightmare: the most destructive computer virus ever has been traced to your machine. Computer programmer Jerzy Rugby spends his days blissfully hacking away in cyberspace — aiding the GoMotion Corporation in its noble quest to create intelligent robots. Then an electronic ant gets into the machinery ... then more ants .... then millions and millions of the nasty viral pests appear out of nowhere to wreak havoc throughout the Net. And suddenly Jerzy Rugby is Public Enemy Number One, wanted for sabotage, computer crime, and treason — a patsy who must now get to the bottom of the virtual insectile plague. "Rudy Rucker warms the cockles of my heart ... I think of him as the Scarlet Pimpernel of science fiction." — Philip Jose Farmer

Dispossession Pete Daniel 2013-03-29 Between 1940 and 1974, the number of African American farmers fell from 681,790 to just 45,594--a drop of 93 percent. In his hard-hitting book, historian Pete Daniel analyzes this decline and chronicles black farmers' fierce struggles to remain on the land in the face of discrimination by bureaucrats in the U.S. Department of Agriculture. He exposes the shameful fact that at the very moment civil rights laws promised to end discrimination, hundreds of thousands of black farmers lost their hold on the land as they were denied loans, information, and access to the programs essential to survival in a capital-intensive farm structure. More than a matter of neglect of these farmers and their rights, this "passive nullification" consisted of a blizzard of bureaucratic obfuscation, blatant acts of discrimination and cronyism, violence, and intimidation. Dispossession recovers a lost chapter of the black experience in the American South, presenting a counternarrative to the conventional story of the progress achieved by the civil rights movement.

Democratic Promise Lawrence Goodwyn 1976 "This book is about the decline of freedom in America," Lawrence Goodwyn writes, and he then proceeds to overturn three generations of historical literature on Populism and to cast a radically new light on what he calls the undemocratic "progressive society" of twentieth-century America. Designed as a protest against special privilege and the growing despotism of industrialism, Populism brought together farmer and worker, black and white. The agrarian revolt began in Texas in the 1870s,

spread throughout the South and Midwest, and reached its apex as the People's Party in the early 1890s, dedicated to a fundamental restructuring of finance capitalism and the American banking system. The movement was exploited in William Jennings Bryan's 1896 presidential bid and then disintegrated, leaving us with a word--"populist"--Which is today much used and misused.--Publisher's description.

Guiding Young Children Patricia F. Hearn 2005 The seventh edition of this popular book supports the authors' belief that guidance is more than getting children to do what you want them to do now; it is helping them to become everything they can become for all of their tomorrows. The book provides an overview, followed by discussion of core concepts, strategies for applying those concepts, and, finally, the broader perspective of professionalism and human resource development. Its approach focuses on the need to consider a child's developmental level as well as family and cultural context when planning environments and activities for young children. Unlike others in the field, it offers concrete suggestions on how to guide children while they are involved in specific activities such as playing, eating, napping, etc. For

teachers and parents of young children.

**Lost Revolutions** Pete Daniel 2000 Chronicles the events and societal trends that created disturbance and conflict after World War II, discussing school integration, migration into the cities, the civil rights movement, and the breakdown of traditional values.

**The Rise of the American Conservation Movement** Dorceta E. Taylor 2016-08-05 In this sweeping social history Dorceta E. Taylor examines the emergence and rise of the multifaceted U.S. conservation movement from the mid-nineteenth to the early twentieth century. She shows how race, class, and gender influenced every aspect of the movement, including the establishment of parks; campaigns to protect wild game, birds, and fish; forest conservation; outdoor recreation; and the movement's links to nineteenth-century ideologies. Initially led by white urban elites—whose early efforts discriminated against the lower class and were often tied up with slavery and the appropriation of Native lands—the movement benefited from contributions to policy making, knowledge about the environment, and activism by the poor and working class, people of color, women, and Native Americans. Far-ranging and nuanced, *The Rise of the American Conservation Movement* comprehensively

documents the movement's competing motivations, conflicts, problematic practices, and achievements in new ways.

Forty Acres and a Mule Claude F. Oubre 1978 First published in 1978, Claude F. Oubre's Forty Acres and a Mule has since become a definitive study in the

history of American Reconstruction. Drawing on a vast collection of government records and newspapers, Oubre examines what he sees as the crucial question of Reconstruction: Why were the far majority of freed slaves denied the opportunity to own land during the Reconstruction era, leaving them vulnerable to a persecution that strongly resembled slavery? Oubre recounts the struggle of black families to acquire land and how the U.S. government agency Freedmen's Bureau both served and obstructed them. This groundbreaking book offers an indispensable resource for anyone eager to understand the evolution of slavery studies.

Designing Integrated Industrial Policies Volume II Shigeru Thomas Otsubo  
2020-12-01 Very little has been written on industrialization and deindustrialization in Asia and Africa. This reference work sheds illuminating light upon the industrial development in Asia and Africa. It also provides an in-depth look into China's engagement and migrant labour in Africa. The book also addresses the roles of public-private partnership (PPP) and international development cooperation and how they are fundamental to industrialization in Asia and Africa. Designing Integrated Industrial Policies will be a very useful reference particularly as a how-to guide on industrial promotion and designing

integrated industrial policies not only for economic growth and job creation but also for "inclusive" development. It comes with country cases and illustrates useful tools for industrial policy simulation and for evidence-based policy making through these concrete examples.

Going North Neil Fligstein 2013-09-03 Going North: Migration of Blacks and Whites from the South, 1900—1950 discusses the historical, demographic, sociological, and economic reasons for black and white migrations. The book explains the transition from a rural, extractive economy to an urban, industrial and service economy, with emphasis on the effects on the Southern rural population. After the Civil War, emerging business concerns became politically and economically significant, making the South a source for needed resources. 1930 was a defining year. Before 1930, migration reflected the growth and contraction of cotton agriculture in the South. After 1930, the transition from a tenant, labor-intensive cotton agriculture economy to a capitalist machine-driven economy caused the black and white migration to the

north. American development was not a simple process—it shows how northern business interests defeated southern planters. This transformation has created a permanent underclass in society that can be found in the cities of the South, North, and Midwest regions of America today. Sociologists, economists, academicians doing sociological research, and students of U.S. history can benefit from reading the book.
