Lead to Serve and Serve to Lead Robert Armfield 2022-05-10 LEAD TO SERVE AND SERVE TO LEAD, Leading Well in Turbulent Times, is written for leaders at all levels to equip them with the skills needed to succeed in today's challenging world. The authors are practitioners who offer a book that combines leadership characteristics with real-life experiences to equip anyone who desires to serve others well as their leader. The book is clearly formatted with the "bottom-line up front" and leads off each chapter with the key points. The authors begin by stressing the importance of character and the necessity of a true moral compass as the foundation for any good and enduring leader. It discusses building trust through effective communication and understanding organizational culture and the impact it has on how you lead. The book then digs into how to build teams, or lead the team you have, along with creating a vision and bringing it to reality. A key topic this book addresses is how to lead during a crisis where the leader is completely exposed and on the line. Other critical skills such as developing new leaders, setting expectations, giving effective feedback, and writing evaluations are explained in LEAD TO SERVE using examples from the authors' experiences. The authors end the book by explaining why it is so important for a leader to know when an organization is reaching peak performance and what must be done to keep that performance from degrading when the environment in which you operate has changed. The lessons in the book are written on the background of the societal turbulence in which we live so the leader understands that it must be factored into the exercise of leadership.

Post-Vietnam Dioxin Exposure in Agent Orange-Contaminated C-123 Aircraft Institute of Medicine 2015-05-20 From 1972 to 1982, approximately 1,500-2,100 US Air Force Reserve personnel trained and worked on C-123 aircraft that had formerly been used to spray herbicides in Vietnam as part of Operation Ranch Hand. After becoming aware that some of the aircraft on which they had worked had previously served this purpose, some of these AF Reservists applied to the US Department of Veterans Affairs (VA) for compensatory coverage under the Agent Orange Act of 1991. The Act provides health care and disability coverage for health conditions that have been deemed presumptively service-related for herbicide exposure during the Vietnam War. The VA denied the applications on the basis that these veterans were ineligible because as non-Vietnam-era veterans or as Vietnam-era veterans without "boots on the ground" service in Vietnam, they were not covered. However, with the knowledge that some air and wipe samples taken between 1979 and 2009 from some of the C-123s used in Operation Ranch Hand showed the presence of agent orange residues, representatives of the C-123 Veterans Association began a concerted effort to reverse VA's position and obtain coverage. At the request of the VA, Post-Vietnam Dioxin Exposure in Agent Orange-Contaminated C-123 Aircraft evaluates whether or not service in these C-123s could have plausibly resulted in exposures detrimental to the health of these Air Force Reservists. The Institute of Medicine assembled an expert committee to address this question qualitatively, but in a scientific and evidence-based fashion. This report evaluates the reliability of the available information for establishing exposure and addresses and places in context whether any documented residues represent potentially harmful exposure by characterizing the amounts available and the degree to which absorption might be expected. Post-Vietnam Dioxin Exposure rejects the idea that the dioxin residues detected on interior surfaces of the C-123s were immobile and effectively inaccessible to the Reservists as a source of exposure. Accordingly, this report states with confidence that the Air Force Reservists were exposed when working in the Operation Ranch Hand C-123s and so experienced some increase in their risk of a variety of adverse responses.

Instrument Procedures Handbook Federal Aviation Administration 2008-04-17 Designed as a technical reference for instrument-rated pilots who want to maximize their skills in an "Instrument Flight Rules" environment, the Federal Aviation Administration's Instrument Procedures Handbook contains the most current information on FAA regulations, the latest changes to procedures, and guidance on how to operate safely within the National Airspace System in all conditions. In-depth sections cover takeoffs and departures, en route operations, arrivals and approach, system improvement plans, and helicopter instrument procedures. Thorough safety information covers relevant subjects such as runway incursion, land and hold short operations, controlled flight into terrain, and human factors. Featuring an index, an appendix, a glossary, full-color photos, and illustrations, the Instrument Procedures Handbook is a valuable training aid and reference for pilots, instructors, and flight students, and the most authoritative book on instrument use anywhere.

The Praetorian STARShip : the untold story of the Combat Talon 2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

Special Air Warfare and the Secret War in Laos Air University Press 2019-07-02 The story of special air warfare and the Air Commandos who served for the ambassadors in Laos from 1964 to 1975 is captured through extensive research and veteran interviews. The author has meticulously put together a comprehensive overview of the involvement of USAF Air Commandos who served in Laos as trainers, advisors, and clandestine combat forces to prevent the communist takeover of the Royal Lao Government. This book includes pictures of those operations, unveils what had been a US government secret war, and adds a substantial contribution to understanding the wider war in Southeast Asia.
