That's Just Not It A. L. Cabral 2020-08-06 ABOUT THE BOOK That's Just Not It is a contemporary fiction novella narrated by a young Filipina named Jesse Danielle or JD for short, who recalls her youth and her memories as a child before her mother and her sister migrated abroad while she decided to live with her father in her home country. A decade after, her sister comes back home to introduce her boyfriend and the past catches up to JD as she reflects on the paths she and her sister have taken. As JD reflects on the life she has so far lived, she comprehends what the real meaning of life is and what makes a person successful. Along the way, she makes realizations about issues of racial discrimination, xenocentrism, and prejudice. Rather than exploring the ideas of what life is, the existentialist topic of the novella is exploring what life isn't. Rather than describing what happiness looks like, the novella describes what it doesn't look like.

The Diversity of Living Organisms R. S. K. Barnes 2009-07-17 Such is the pressure on teaching time in schools and universities that students are taught less and less of the diversity that is life on this planet. Most students, and indeed most professional biologists that these students become, know far more of cell function than of biodiversity. This text is a profusely illustrated, quick-reference guide to all types of living organisms, from the single-celled prokaryotes and eukaryotes to the multicellular fungi, plants and animals. All surviving phyla and their component classes are characterised and described, as are their lifestyles, ecology, relationships, and within-group diversity (with orders displayed in list form). Overall, the book's aim is to provide biologists and others with a clear, concise picture of the nature of all groups of

organisms with which they may be unfamiliar.

Objective General English SP Bakshi 2021-07-17 1. 'Objective General English' help in revising & preparing the concepts of English of many competitive exams 2. It is divided into four parts; 3.
