**Architecture of Topic** Valéria Molnár 2019-08-19 This volume contains innovative papers that target the linguistic status of topic at the interface between grammar and discourse. The purpose of the volume is to discuss the universal properties of topics and, at the same time, to document the range of discourse-semantic and grammatical variation within this phenomenon in European languages. The volume is structured accordingly: (i) theoretical foundations of topicality in grammar and discourse; (ii) discourse-semantic correlates of topicality; (iii) variation in the grammatical (external and internal) encoding of topicality; (iv) topics from the diachronic perspective. The articles take different perspectives, including contrastive studies of modern languages, studies on diachronic development, and typological generalizations. They also take into consideration various types of empirical data – introspective data, semi-spontaneously produced data, experimental data and language corpora. The articles in this volume show that the concept of topic is necessary for the description and explanation of a number of discourse-semantic phenomena. They present a state of the art account of the architecture of topic while making recent research on the phenomenon accessible to a wider readership.

Returns not permitted, orphans preferred. Amsterdam, 1620. Jana Beil has learned that life rarely provides moments of joy. Having run away from a violent father, her days are spent searching for work in an effort to stay out of the city brothels, where desperate women trade their bodies for a mouthful of bread. But when Jana is hired as a servant for the wealthy and kind Master Reynst and his beautiful daughter Sontje, Jana's future begins to look brighter. Then Master Reynst loses his fortune on a bad investment, and everything changes. The house is sold to creditors, leaving Jana back on the street and Sontje without a future. With no other choice, Jana and Sontje are forced to sign with the East India Company as Company Daughters: sailing to a colonial Dutch outpost to become the brides of male settlers they know nothing about. *An Aid to Radiology for the MRCP* K. K. Ray 2000-04-17 Co-written by the author of the best-seller *An Aid to the MRCP Short Cases* this new, systematically organized text concentrates on examples that are frequently examined in the MRCP Part 2 written examination - saving candidates time during revision and enabling them to concentrate on weaker specialities. By including high quality images and labelling abnormal findings on the original images, the authors enable the reader to feel confident about recognizing specific radiological abnormalities, instead of guessing where the abnormality lies. In order to avoid guessing, the reader is asked to describe the radiological findings in each case. In the Question section, each page is dedicated to an X-ray and

sample questions. An Answer section, with further radiographs to highlight variations and details, is given at the end of the book to provide background knowledge.

Linguistic Evidence Stephan Kepser 2005-01-01 The renaissance of corpus linguistics and promising developments in experimental linguistic techniques in recent years have led to a remarkable revival of interest in issues of the empirical base of linguistic theory in general, and the status of different kinds of linguistic evidence in particular. Consensus is growing (a) that even so-called primary data (from introspection as well as authentic language production) are inherently complex performance data only indirectly reflecting the subject of linguistic theory, (b) that for an appropriate foundation of linguistic theories evidence from different sources such as introspective data, corpus data, data from (psycho-)linguistic experiments, historical and diachronic data, typological data, neurolinguistic data and language learning data are not only welcome but also often necessary. It is in particular by contrasting evidence from different sources with respect to particular research questions that we may gain a deeper understanding of the status and quality of the individual types of linguistic evidence on the one hand, and of their mutual relationship and respective weight on the other. The present volume is a collection of (selected) papers presented at the conference on 'Linguistic Evidence' in Tübingen 2004, which was explicitly devoted to the above issues. All of them address these issues in relation to specific linguistic research problems, thereby helping to establish a better understanding of the nature of linguistic evidence in particularly insightful ways.

The New Faculty Member Robert Boice 1992-04-10 For the first time in decades, most American campuses are in the midst of hiring large groups of new faculty. As competition for the most qualified candidates increases, institutions must work harder than ever to attract and retain the best and most diverse prospects. This often requires investing considerable resources in recruitment and hiring--and makes it imperative that new hires are not lost to competitors or to unhappy or unproductive beginnings. In this book, Robert Boice offers a range of proven support strategies designed to help new faculty thrive--from campuswide programs for nurturing newcomers to projects that help them to help themselves. Boice identifies the major challenges facing most new faculty--teaching, scholarly writing, and simply fitting in as colleagues--and provides tested solutions for helping them cope. He outlines a structured mentoring program to build collegiality through social support networks. And

he presents specific techniques for helping new faculty find time, fluency, and balance as writers, including advice on dealing with editorial evaluations or rejections. The author also details a variety of self-help projects, including exercise and mood management groups run largely by new faculty, as well as faculty handbooks and newsletters. And perhaps most important, he tells how to gain the crucial support of department chairs, deans, and other administrators, secure funds to get programs off the ground, and keep new programs manageable and successful.

Transmorphing Utopia 2017-03-20 Transmorphing Utopia is the first major publication on the astutely absurd work of artist Paul W. Wadell. This richly illustrated book includes essays by independent curator Santiago Verneti and celebrated author Jonathan Griffin, as well as an exclusive interview between Waddell and the artist Chelsea Coon. The texts offer generous insights into the full scope and depth of Waddell's career across his varied mediums and disciplines. The full color reproductions bring together images from two seminal series of painting: LOOSE HEADS (paintings that look for you) and TRANSMORPHING. Verneti's essay, which is chock-

full of his characteristically refreshing wit, deftly situates these paintings within their appropriate art historical lineage while offering amusingly perceptive interpretations. Griffin's personal reflection untangles the various strands of Waddell's oeuvre, and considers what artistic personas the artist adopts when addressing his audience. The interview between Coon and Waddell, two of the most engaging and exciting figures in the contemporary art scene, lays bare the impulses and influences that drive and inform their performance practices. Despite its content and contributors, this publication just barely scratches the surface of one of Southern California's most intriguing artists, and will leave readers delightfully unquenched.

Municipal Medicine John Welshman 2000 Oxford, Bern, Berlin, Bruxelles, Frankfurt/M., New York, Wien. Studies in the History of Medicine. Vol. 1 General Editor: Charles Webster. This book provides the most comprehensive study yet produced of public health in twentieth-century Britain. Based in part on a case-study of the East Midlands city of Leicester, it explores the history of public health from the early 1900s to the health service reorganisation of 1974. The author examines the economic, political, and social context for health provision in Leicester, and the ideological background to policy in such areas as mental health and slum clearance. Particular attention is paid to the infectious disease of tuberculosis, and to the provision of services for schoolchildren through the School Health Service. This study further explores public health policy under the National Health Service, and looks at the wider relationships of the local authority - with general practice, hospitals and hospital boards, and central government departments. Public health in twentieth-century Britain has until now been comparatively neglected by historians of health care and social policy. This book remedies that neglect, and opens up numerous unexplored areas for further investigation. Contents: Economic, political and social context of public health provision in Leicester - Ideological background to public health - mental health, birth control, slum clearance - Tuberculosis - School Health Service - Public health and the National Health Service - Wider relationships - general practice, hospitals, central government departments - Conclusion - Bibliography.

A Guide to Starting Your Hedge Fund Erik Serrano Berntsen 2015-03-03 Successful hedge fund investing begins with well-informed strategy A Guide to Starting Your Hedge Fund is a practical, definitive "how-to" guide,

designed to help managers design and launch their own funds, and to help investors select and diligence new funds. The first book to examine the practical aspects of setting up and operating funds with a focus on energy commodity markets, this book scrutinises the due diligence process and comprehensively reviews the opportunities and risks of all energy commodity markets as hedge fund investments. Extensive planning and strategy advice prove invaluable to prospective fund managers and investors alike, and detailed discussion of the markets' constraints help inform procedural decisions. Readers gain insight into practical matters including legal and commercial structures, due diligence, fund raising, operations, and more, allowing them to construct a concrete investment plan before ever touching a penny. Asset managers are looking to energy commodities to provide attractive uncorrelated – if volatile – returns. These high returns, however, are accompanied by high risk. Few investors have experience evaluating these investment opportunities, and few prospective fund managers understand the market fundamentals and their associated risks. This book provides the answers sorely lacking in hedge fund literature, giving investors and fund managers the background they need to make smarter decisions. Understand the markets' structures, opportunities, and risks Develop a comprehensive, well-informed investment strategy Conduct thorough due diligence with a detailed plan Examine the practical aspects of fund raising, legal and tax structure, and more Oil has long been traded by hedge funds, but electricity, the fuels that generate electricity, and the environmental products like emissions allowances and weather derivatives have become the new "hot" investment strategies. These high returns come with higher risk, but A Guide to Starting Your Hedge Fund ensures participants have essential information at their disposal.

Topicalization and Stress Clash Avoidance in the History of English Augustin Speyer 2010 "The book is concerned with the interaction of syntax, information structure and prosody in the history of English, demonstrating this with a case study of object topicalization. The approach is data-oriented, using material from syntactically parsed digital corpora of Old, Middle and Early Modern English, which serve as a solid foundation for conclusions. The use of object topicalization underwent a sharp decline from Old English until today. In the present volume, a basic prosodic well-formedness condition, the Clash Avoidance Requirement, is identified as the main factor for this change. With the loss of V2-syntax, object topicalization led more easily to cases in which two focalized phrases, the topicalized object and the subject, are adjacent. The two focal accents on these phrases would produce a clash, thus violating the Clash Avoidance Requirement. In order to circumvent this, the use of topicalization in critical cases is avoided. The Clash Avoidance Requirement is highly relevant also today, as experimental data on English and German show. Further, the Clash Avoidance Requirement helps to explain the well-known syntactic structure of the left periphery in Old English. An analysis positing two subject positions is defended in the study. The variation of these subject positions is shown to depend not on pronominal vs. lexical status of the subject but on information structural properties."--Publisher's website.
