This report from the Home Affairs Select Committee cautions the Government against introducing measures which could damage the UK's thriving educational export sector. The Committee remains concerned that a number of the Government proposals could have serious unintended consequences. International students make up 10% of first degree students and over 40% of postgraduate students at UK universities. The international student market, estimated to be worth £40 billion to the UK economy is a significant growth market and the UK is the second most popular destination in the world for international students. The Committee's findings include: the importance of the Post-Study Work route in attracting students to the UK and disagrees with the Government proposal to close it; it suggests alternatives to the Government's proposals on language requirements, specifically a permanent change to the parameters of the student visitor visa so that it can be used as a viable route for

all of those attending pre-degree programmes; it supports the Government's proposals to tighten the accreditation of language schools but is concerned that Government approval of the current accreditation bodies has lapsed. The Committee calls for a single streamlined accreditation system and agrees that any cap on student visas is unnecessary and undesirable; the Committee also notes that progress has been made on closing down bogus language schools and supports the Government's intention to crack down on bogus colleges and bogus students but it is not persuaded that students are migrants, as defined by the UN and suggests that students ought to be excluded from net migration numbers. The Committee also raises concerns that the data used in assessing migration figures are not fit for purpose and could inhibit effective policy making. DANCING IS A PART OF BEING HUMAN. Even people who have the cliché "two left feet" and cannot learn to follow the steps of any social dance, still feel the urge to twirl themselves around in moments of joy. Even people who cannot walk and must get around in wheelchairs respond to the desire to dance - there is a Wheelchair Dancers Organization. For some people social dancing is not enough. They feel the need to make dancing the central part of their life. For these people, seeking a career as a dancer is an act of love. If you are one of those who think this might be what you want to do, you must think twice. If being a dancer is not something you absolutely must do with your life, then you should seriously consider some other career. You should understand that every other dancer against whom you will be competing for the limited number of professional dance jobs available is committed with all of their being to this art. You can certainly want to dance for fun, for your own pleasure, and as a recreational outlet for your creative spirit. If you are serious about a professional career in dance, then you must be prepared for disappointment, discouragement, and physical pain as you follow your passion. If you have the dedication, there are many things to do to give yourself the best chance for success. You will, of course, always be taking dance classes, probably from a very early age. You may already be interested in a particular technique or the work of a specific

choreographer. Many dancers, choreographers, and teachers would encourage you to broaden your horizons and try to take in as many different dance, music, and art styles that you can. They would also likely encourage you to follow some form of meditation, to work on opening up your inner, spiritual self. Serious dancers believe that what they do is spiritual, that through dance they are connecting with humanity and with the universe. You will find that all the different qualities you need to be a professional dancer are connected. The spiritual, intellectual, physical, and emotional sides of yourself must all be in harmony and working together. Support will come from outside of yourself as well as from within. Although the dance world is very competitive, it is also an environment that nurtures its members. If you pursue this career, you will discover that you are part of an enormous family everywhere you go. They will be there to cheer for you when things are going well, and they will be there to give a helping hand when you are hurting, and when you need a push to keep going, they will be there for that, too."

The issue of the EasyUni Guidebook hopes to inspire the young people to empower themselves, even in their own ways. As the country enters a new year, full of hope, may we see more young people involved and get active and build a better Malaysia for the next generations to come.

Further Education is the most diverse of all the education sectors. Managing diversity and promoting equality, a legislative requirement of the 2010 Equalities Act, brings significant challenges for practitioners who are tasked with making the rhetoric of politicians a reality, often with little guidance and few resources. This book provides practical guidance for existing lecturers and trainee teachers, explaining how they can overcome these challenges and establish a positive learning environment to meet the needs of all learners. This accessible and up to date book extends the scope of the diversity and inclusion debate to consider a wide range of issues including age, working with cross-cultural groups, promoting effective gender relations, sexual orientation and working with current and ex-offenders. Each chapter includes clear objectives, case studies, critical thinking tasks, chapter reflections and a learning review audit.

THE SUNDAY TIMES BESTSELLER. PUBLISHED IN ASSOCIATION WITH LEEDS UNITED TO COINCIDE WITH THE CLUB'S CENTENARY CELEBRATIONS. 'Every up and down at Leeds United. Essential reading.' Phil Hay 100 Years of Leeds United tells the story of a one-club city and its unique relationship with its football team. Since its foundation in 1919, Leeds United Football Club has seen more ups and downs than most, rising to global fame through an inimitable and uncompromising style in the 70s, clinching the last Division One title prior to the Premier League's inauguration in 1992, before a spectacular fall from grace at the start of the 21st century. United remains one of the best supported - and most divisive - clubs in football, with supporters' clubs dotted across the globe. In 100 Years of Leeds United, Chapman delves deep into the archives to discover the lesser-known episodes, providing fresh context to the folkloric tales that have shaped the club we know today, painting the definitive picture of the West Yorkshire giants.

The highly-respected book of reference of sought-after Independent Schools in membership of the Independent Schools Council's Associations: HMC, GSA, The Society of Heads, IAPS, ISA and COBIS.

This book is a radical approach to the notion of higher education. Students undertake study for a degree or diploma primarily in their workplace and their learning opportunities are not contrived for study purposes but arise from normal work. Work-based Learning is the first comprehensive book on this major innovation.

What happens to young people who are defined as lower attainers or having learning difficulties in a global knowledge economy? How do we stop those with learning difficulties or disabilities being seen as social problems or simply as consumers of resources? Governments in developed countries are driven by the belief that in a global economy all citizens should be economically productive, yet they are still not clear about the relationship between the education of low attainers and the labour market.

*Ignorant Yobs?: Low Attainers in a Global Knowledge Economy* examines this international phenomenon, exploring how those with learning difficulties are treated in a world economy where even low-skilled jobs require qualifications. This unique book provides an examination of countries which converge on the issue of the low attaining

population, despite differing on political, economic and cultural dimensions. In doing so, it considers some thorny issues at the forefront of education policy and provision: The increasing competitive stratification within education systems; The impact of governments who have put competition in the labour market at the heart of their policies; Social control of potentially disruptive groups, social cohesion and the human rights agenda; The expansion of a special education industry driven by the needs of middle class, aspirant and knowledgeable parents, anxious about the success of their 'less able' children. Written by an internationally renowned scholar, Ignorant Yobs?: Low Attainers in a Global Knowledge Economy synthesises a range of complex, highly topical issues and suggests how those with learning difficulties might, with government and employer support, contribute to a flexible labour market. This book, using original discussions in England, the USA, Germany, Malta and Finland, will be of interest to a wide audience of policy-makers, practitioners, administrators, and politicians, in addition to undergraduate, postgraduate and research students and academics.

Matches the BTEC specification which will apply from September 2007 and provides in-depth coverage of a further ten optional units for the Development, Coaching and Fitness, and Performance and Excellence pathways covered in Book 1.

This book addresses strategies for teaching and recording achievement as well as exploring ways in which students learn. Readers are invited, through a case study approach, to consider differing student needs and how they might be served within FE.
