Kicking evil's ass is just another thing on Kate Connor's to-do list, but she'll manage it with wit and wisdom, and then drive home in her minivan." —Christopher Golden, New York Times bestselling author of ARARAT and RED HANDS Kate Conner is an expert at multi-tasking. Wife, mom, demon-hunter. She can stuff hundreds of Easter eggs for the neighborhood fair and still have enough energy to pummel a demon back into the ether. But Kate's life has gotten more complicated... Her first husband has returned from the dead in the body of her daughter's chemistry teacher. Different body, same hot desire for Kate. Her daughter now obsesses about becoming a demon-hunter the way she used to obsess about boys. And her current husband is suddenly very suspicious of his wife's extra-domestic activities. What is she doing and who is she doing it with? And the threat has gotten bigger... A powerful high demon has returned to San Diablo, seeking not only the key to invincibility, but revenge upon Kate—and Kate's family. And just in case that wasn't trouble enough, there's a new kind of evil in suburbia. The walking dead kind. And they don't mind making house calls... This book examines the behavior of high-tech startups and important aspects of innovation ecosystems in Brazil. It discusses how the local business environment boosts startups and high-tech entrepreneurship, leading to the most successful implementation of technology parks and incubation movements in Latin America. In the first part, the chapters explore the experience of Brazilian high-tech startups with regard to innovation, funding, background of the entrepreneur and their efforts entering international markets. The second part is dedicated to innovation ecosystems and explains the role of business incubators, acceleration programs, and university entrepreneurship in the country.

"This book, written by three authors from three different countries, speaking three different languages who happen to be doctoral students at one of the largest business schools in Europe, provides fascinating kaleidoscopic insights on the contextual topics of global concern. The three, in their own unique ways provide an in-depth understanding of the various decisive elements prevailing in the global business environment. The unstructured and informal approach of the experienced researchers brings out many candid and insightful observations of global business players from various industries. The book provides glimpses of the leadership challenges, opportunities and the operational response options as well as evolving business models and job profiles in the emerging knowledge era. The idea presented is well thought out, easy to contextualise and simple to operate. The transformational paradigm provided by the authors is justified by the recent happenings in the global business world. Also, the paradigm is futuristic and provides for the leadership exigencies of the dynamic, disruptive fast changing business environment. Tomorrow is uncharted. How does one step into uncharted territory? What does globalisation globalise? Does globalisation augment localisation? What kind of innovative management thinking and practices are required to meet the challenges of instant global connectivity and networking? How different will tomorrow be from today? What traits would be essential for future managers and business leaders? These and many more questions from the basis of this book. The book also throws light on how proactive learning is and how it will be a critical success factor in the fast-emerging knowledge era. "

After fourteen years as the perfect suburban housewife, soccer mom, and political wife, Kate Connor secretly returns to her old profession as a demon hunter, fending off demon attacks, trying to keep an eye on a mysterious new high school teacher who looks strangely familiar, and dealing with her teenage daughter's infatuation with a surfer dude. Tales of a Demon-Hunting Soccer Mom "Sprightly, fast-paced . . . readers will find spunky Kate hard not to root for in spheres both domestic and demonic."—Publishers Weekly (CarpeDemon) Demon-Hunter Kate Connor is having a very bad month. Her resurrected first husband houses the soul of a demon. Her current husband is being overly attentive to the point of smothering. Her toddler son has entered a tantrum phase. And her teenage daughter is still determined to be the next, best demon slayer. Worse, she's determined to get her learner's permit the day she turns fifteen. That's a lot for one woman to juggle, even a Demon-Hunter. Add saving the world to the mix, and things are about to get complicated... "Kenner scores a direct hit with this offbeat and humorous adventure, which has an engaging cast of characters. Car pools and holy water make an unforgettable mix."—RT Book Reviews Once again, Kate Connor has a problem. Several, actually. For one thing, her daughter has figured out that mom is a demon-hunter—and wants to be just like her when she grows up. And there's that nagging suspicion that her dead husband has come back to life in the body of another man. Plus, her living husband still doesn't know her secrets. Not to mention the fact that she's acquired a mystical item that the entire demon community seems hell-bent on reclaiming. It's all in a day's work for this stay-at-home mom. But one thing is for certain: sometimes life in the suburbs really can be hell. The way organizations manage entrepreneurship has changed dramatically over the past decade. Today, organizations take account of economic issues, but they also adopt a broader perspective of their purpose including social and environmental issues (i.e. sustainability). Yet, despite its global spread, sustainable entrepreneurship remains an uncertain and poorly defined ambition with few absolutes. This book reaffirms the important need to improve comprehension and explore the subtleties of how individuals, groups, and organizations can discover, create, and seize opportunities for blended value generation, by designing and operating sustainable ventures. It examines, in an interdisciplinary fashion and across sectoral and geographical boundaries, how entrepreneurial activities can be developed to be generally consistent with sustainable development goals, as well as by whom, for what reasons, and with what implications.

The Editors comprehensively review key dimensions of the sustainable entrepreneurship phenomenon to establish an essential definition and up-to-date picture of the field. The 19 chapters cover 4 main topics: Understanding the intentions and motivations for sustainable entrepreneurship Fostering and enacting sustainability through entrepreneurial action Leading and inspiring sustainable entrepreneurial action Finding the contextually grounded implications of and challenges to sustainable entrepreneurship and blended value generation This book is an important resource for entrepreneurs and policy makers as well as students in the fields of entrepreneurship, innovation, and sustainability.

Advances in Design examines recent advances and innovations in product design paradigms, methods, tools and applications. It presents fifty-two selected papers which were presented at the 14th CIRP International Design Seminar held in May 2004. This book will be bought by postgraduate and senior undergraduate students studying product design. It will also be of interest to researchers and practitioners working in the field of product design.

The annual series Global Conferences on Sustainable Manufacturing (GCSM) sponsored by the International Academy for Production Engineering (CIRP) is committed to excellence in the creation of sustainable products and processes that conserve energy and natural resources, have minimal negative impacts upon the natural environment and society, and adhere to the core principle of sustainability by considering the needs of the present without compromising the ability of future generations to meet their own needs. To promote this noble goal, there is a great need for increased awareness in education and training, including the dissemination of new findings on principles and practices of sustainability applied to manufacturing. The series Global Conferences on Sustainable Manufacturing offers international colleagues the opportunity to network, expand their knowledge, and improve practice globally.

Summary of Salt Sugar Fat by Michael Moss | Includes Analysis Preview: Salt Sugar Fat by Michael Moss is a compelling nonfiction investigation into how corporate food manufacturers have come to rely on salt, sugar, and fat as the mainstays of processed and prepackaged food. The food industry in the United States has become intensely dependent on these three potentially harmful ingredients to achieve its massive profits. This reliance has contributed to myriad public health problems, such as rising incidence of diabetes and obesity. Food executives have sought to manipulate consumption and drive up revenue at the expense of their consumers' health. The market for processed foods is an extremely competitive o? the average grocery store carries tens of thousands of products, of which only a small percentage will remain on the shelf and produce modest sales by industry standards. To maintain an advantage against rival companies, food manufacturers must continually churn out products that consumers crave... This study evaluates the effectiveness of IFC's strategic priority of private sector development in frontier countries (high-risk and/or low-income) by supporting micro, small, and medium enterprises (MSMEs) during fiscal years (FY)1994-2006. IFC has channeled its support to MSME's by: i) indirect financing through financial intermediaries, and ii) by indirect institution-building support via specialized regional small and medium enterprise (SME) development facilities. This evaluation analyzes IFC's development results and provides recommendations on how IFC's performance can be improved in this area going forward.

The challenges of sustainable manufacturing were accepted by several research institutions at the Technical University Berlin and lead to the establishment of the Collaborative Research Center (Sfb) 281 Dissassembly Factories for the Recovery of Resources in Product and Material Cycles funded by the German Research Foundation in 1995. This book details the numerous scientific results that are now available after 12 years of research.
