Excerpt: The Cessna 172 Skyhawk is a four-seat, single-engine, high-wing fixed-wing aircraft. First flown in 1955 and still in production, more Cessna 172s have been built than any other aircraft. Measured by its longevity and popularity, the Cessna 172 is the most successful mass produced light aircraft in history. The first production models were delivered in 1956 and they are still in production. As of 2008, more than 43,000 had been built. The Skyhawk's main competitors have been the Beechcraft Musketeer and Grumman AA-5 series (neither in production), the Piper Cherokee and, more recently, the Diamond DA40. The Cessna 172 started life as a tricycle landing gear variant of the taildragger Cessna 170, with a basic level of standard equipment. In January 1955 the company had flown an improved variant of the Cessna 170, a Continental O-300-A powered Cessna 170C with a...

Polished mahogany, Corinthian leather, and cutting-edge technology are standard amenities in the world of business jets. Since 1969, no line of "bizjets" has ferried more captains of industry and celebrities in style and safety than Cessna's bestselling Citation series. This all-color history of Citations begins with the company's entry into the corporate jet market and traces the evolution of the series through the nearly supersonic Citation 10 (Mach 0.92). Air-to-air photos, detail shots of interiors, cockpit views, and production line images examine all Citation models.
