This shocking, surprisingly entertaining romp into the intellectual nether regions of today's underthirty set reveals the disturbing and, ultimately, incontrovertible truth: cyberculture is turning us into a society of know-nothings. The Dumbest Generation is a dire report on the intellectual life of young adults and a timely warning of its impact on American democracy and culture. For decades, concern has been brewing about the dumbed-down popular culture available to young people and the impact it has on their futures. But at the dawn of the digital age, many thought they saw an answer: the internet, email, blogs, and interactive and hyper-realistic video games promised to yield a generation of sharper, more aware, and intellectually sophisticated children. The terms "information superhighway" and "knowledge economy" entered the lexicon, and we assumed that teens would use their knowledge and understanding of technology to set themselves apart as the vanguards of this new digital era. That was the promise. But the enlightenment didn't happen. The technology that was supposed to make young adults more aware, diversify their tastes, and improve their verbal skills has had the opposite effect. According to recent reports from the National Endowment for the Arts, most young people in the United States do not read literature, visit museums, or vote. They cannot explain basic scientific methods, recount basic American history, name their local political representatives, or locate Iraq or Israel on a map. The Dumbest Generation: How the Digital Age Stupefies Young Americans and Jeopardizes Our Future is a startling examination of the intellectual life of young adults and a timely warning of its impact on American culture and democracy. Over the last few decades, how we view adolescence itself has changed, growing from a pitstop on the road to adulthood to its own space in society, wholly separate from adult life. This change in adolescent culture has gone hand in hand with an insidious infantilization of our culture at large; as adolescents continue to disengage from the adult world, they have built their own, acquiring more spending money, steering classrooms and culture towards their own needs and interests, and now using the technology once promoted as the greatest hope for their futures to indulge in diversions, from MySpace to multiplayer video games, 24/7. Can a nation continue to enjoy political and economic predominance if its citizens refuse to grow up? Drawing upon exhaustive research, personal anecdotes, and historical and social analysis, The Dumbest Generation presents a portrait of the young American mind at this critical juncture, and lays out a compelling vision of how we might address its deficiencies. The Dumbest Generation pulls no punches as it reveals the true cost of the digital age—and our last chance to fix it.

Information and communication technologies are networked. Exchanging information between two points in a network requires both the definition of what kind of information is to be exchanged (standardization) and the definition of rules and procedures of how this information is produced, circulated, and received (regulation). As such, processes of standardization (the negotiation and definition of technical standards) and regimes of regulation (their implementation and control by a legally and/or politically recognized institution) are at the heart of techno-political diplomacy, because they involve a multitude of actors (technical, economic, and political) and arenas (platforms of negotiation) on national, international, and transnational levels. As the term techno-diplomacy suggests, these processes are characterized by strategic actions, and tactical maneuvers among all actors involved and generally require a high degree of both technical knowledge and diplomatic skills by the negotiating parties. This book aims at studying the role of one specific actor in the field of standardization and regulation of information and communication technologies, the International Telecommunication Union from its origins in the mid-19th century to nowadays. In this technodiplomatic game, ITU has been indeed an actor and had a key-role in different realms such as regulations of tariffs, technological standardization and homogeneity, establishment of shared norms, promotion and support of projects and studies for example in developing countries.

This book is the first to examine the brilliant gathering of composers, conductors, and other musicians who fled Nazi Germany and arrived in the Los Angeles area. Musicologist Dorothy Lamb Crawford looks closely at the lives, creative work, and influence of sixteen performers, fourteen composers, and one opera stage director, who joined this immense

migration beginning in the 1930s. Some in this group were famous when they fled Europe, others would gain recognition in the young musical culture of Los Angeles, and still others struggled to establish themselves in an environment often resistant to musical innovation. Emphasizing individual voices, Crawford presents short portraits of Igor Stravinsky, Arnold Schoenberg, and the other musicians while also considering their influence as a group—in the film industry, in music institutions in and around Los Angeles, and as teachers who trained the next generation. The book reveals a uniquely vibrant era when Southern California became a hub of unprecedented musical talent.

In recent years, there has been increased debate about the incorporation of pedagogy into art and curatorial practice—about what has been termed the 'educational turn'. In this companion volume to the critically acclaimed *Curating Subjects*, artists, curators, critics and academics respond to this widely recognised sense of art's paradigmatic re-orientation towards the educational. Consisting primarily of newly commissioned texts, from interviews and position statements to performative texts and dialogues, *Curating and the Educational Turn* also includes a small number of previously published writings that have proved pivotal in the debate so far. This anthology presents an essential enquiry for anyone interested in the cultural politics of production at the intersections of art teaching and learning. *Curating and the Educational Turn* is indispensable reading for anyone interested in curating, art practice and pedagogy as creative, engaged and potentially transformative activities. This timely and important collection provides a forum for what has been described as the 'educational turn' in curating and its more broad-based manifestations in art, education and culture.

Cette thèse vise à comprendre les facteurs de réussite et d'échec à l'université des étudiants diplômés des collèges communaux au Burundi. Pour ce faire, nous avons mené des entretiens semi-directifs à l'issue de leur première année universitaire, et nous nous sommes appuyés sur des modèles théoriques dont les résultats empiriques sont la plupart du temps issus du contexte occidental. Les étudiants formés dans les collèges communaux ont connu et connaissent des conditions de vie et de formation particulièrement difficiles, qui a priori devraient réduire leur chance de réussite à l'université. Pourtant, les résultats obtenus font ressortir une configuration de facteurs et de relations multiples, qui mettent en perspective les études menées dans les pays occidentaux sur les facteurs de réussite et d'échec et soulignent l'importance de considérer avec une attention particulière les contextes culturels et socio-économiques dans lesquels se déroulent les études universitaires.

By means of the analysis of more than 20 national jurisdictions of different legal and geographical origin this book provides a general understanding of the developments that civil and commercial mediation is currently undertaking across the world. The book combines 25 national reports with a General Report analyzing the major trends in civil and commercial mediation worldwide. A number of the key variables that make mediation so effective are studied in depth in the book. The concept of mediation, that varies from country to country. Its legal

framework and the branches of public and private law in which it is used. The legal condition of the mediation agreement and its relevant conditions of form and content, the responsibilities of the parties in the event that they violate this agreement and the effects of this agreement on potential recourse to the courts or to arbitration, as well as with regard to pending cases. As well as the role played by the mediator, his or her appointment or designation, legal and ethical responsibilities, and the role of institutions in mediation. As well as the mediation process, its applicable rules and principles and its costs are analyzed on comparative basis. The book also pays special attention to the outcome of mediation. The enforceability of the settlement reached both in domestic and cross-border mediations constitutes a basic element for the success of the institution and is thoroughly studied. This volume constitutes a unique instrument for those interested on mediation, either practitioners, judges or academics.

Recent case-law and legislation in European company and insolvency law have significantly furthered the integration of European business regulation. In particular, the case-law of the European Court of Justice and the introduction of the EU Insolvency Regulation have provided the stimulus for current reforms in various jurisdictions in the fields of insolvency and financial law. The UK, for instance, has adopted the Enterprise Act in 2002, designed, inter alia, to enhance enterprise and to strengthen the UK's approach to bankruptcy and corporate rescue. In a similar vein, a recent reform in France has modernised French insolvency law and even introduced a tool similar to the successful English 'company voluntary arrangement' (CVA). This book provides a collection of studies by some of the leading English and French experts today, analysing current perspectives of insolvency and financial law in Europe, both on the national as well as on the European level.

The national borders contain one of the most fertile swathes of land on the continent. All this makes for a food culture as fascinatingly distinct as it is startlingly delicious. Chef Yohanis takes the reader on a journey through all the essential dishes of his native country, along the way telling wondrous stories. There are recipes for Doro Wat, chicken slowly stewed with berbere spice; Yeassa Alichia, curried fish stew; and Siga Tibs, flashfried beef cubes. The cuisine also boasts a wealth of vegetarian dishes. Among these are Gomen, minced collard greens with ginger and garlic; Azifa, green lentil salad; and Key Shir, marinated beet and potato salad. Then the book explains the intricacies and variations of Injera, the foundational sourdough flatbread made from the teff grain (which is gluten free and more nutritious than wheat). Complete with photography of the country's stunning landscapes and vibrant artisans, this volume demonstrates why Ethiopian food should be considered as one of the world's greatest, most singular and most enchanting cuisines.

Maurice Potron (1872-1942), a French Jesuit mathematician, constructed and analyzed a highly original, but virtually unknown economic model. This book presents translated versions of all his economic writings, preceded by a long introduction which sketches his life and environment based on extensive archival research and family documents. Potron had no education in economics and almost no contact with the economists of his time. His primary source of inspiration was the social doctrine of the Church, which had been updated at the end of the nineteenth century. Faced with the 'economic evils' of his time, he reacted by utilizing his talents as a mathematician and an engineer to invent and formalize a general disaggregated model in which production, employment, prices and wages are the main unknowns. He introduced four basic principles or normative conditions ('sufficient production', the 'right to rest', 'justice in exchange', and the 'right to live') to define satisfactory regimes of production and labour on the one hand, and of prices and wages on the other. He studied the conditions for the existence of these regimes, both on the quantity side and the value side, and he explored the way to implement them. This book makes it clear that Potron was the first author to develop a full input-output model, to use the Perron-Frobenius theorem in economics, to state a duality result, and to formulate the Hawkins-Simon condition. These are all techniques which now belong to the standard toolkit of economists. This book will be of interest to Economics postgraduate students and researchers, and will be essential reading for courses dealing with the history of mathematical economics in general, and linear production theory in particular.

Crowdsourcing is a relatively recent phenomenon that only appeared in 2006, but it continues to grow and diversify (crowdfunding, crowdcontrol, etc.). This book aims to review this concept and show how it leads to the creation of value and new business opportunities. Chapter 1 is based on four examples: the online-banking sector, an informative television channel, the postal sector and the higher education sector. It shows that in the current context, for a company facing challenges, the crowd remains an untapped resource. The next chapter presents crowdsourcing as a new form of externalization and offers definitions of crowdsourcing. In Chapter 3, the authors attempt to explain how a company can create value by means of a crowdsourcing operation. To do this, authors use a model linking types of value, types of crowd, and the means by which these crowds are accessed. Chapter 4 examines in detail various forms that crowdsourcing may take, by presenting and discussing ten types of crowdsourcing operation. In Chapter 5, the authors imagine and explore the ways in which the dark side of crowdsourcing might be manifested and Chapter 6 offers some insight into the future of crowdsourcing. Contents 1. A Turbulent and Paradoxical Environment. 2. Crowdsourcing: A New Form of Externalization. 3. Crowdsourcing and Value Creation. 4. Forms of Crowdsourcing. 5. The Dangers of Crowdsourcing. 6. As individuals are becoming more and more responsible for ensuring their own financial future, portfolio or fund management has taken on an increasingly important role in banks' ranges of offerings to their clients. In addition, as interest rates have come down and the stock market has gone up and come down again, clients have a choice of leaving their saving in deposit accounts, or putting those savings in unit trusts or investment portfolios which invest in equities and/or bonds. Individuals are becoming aware that they might need to top up government

pension allocations. Likewise, corporations who run employee pension schemes have to ensure that they are able to cover their current and future liabilities. Investing in unit trusts or mutual funds is one way for individuals and corporations alike to potentially enhance the returns on their savings. Introduction to Portfolio Management covers the: \*Theoretical underpinnings of portfolio management \*Basics of portfolio construction \*Constraints to be considered when building a client portfolio \*Types of analysis used for asset allocation and stock selection \*Main types of funds available to investors \*Inspired from the basic entry level training courses that have been developed by major international banks worldwide. \*Will enable MSc Finance students, MBA students and those already in the finance profession to gain an understanding of the basic information and principles underlying the topic under discussion \*Questions with answers, study topics, practical "real world" examples and text with an extensive bibliography and references ensure learning outcomes can be immediately applied

CHRISTOPHE DUPONT (1922-2010), after a career in international negotiations as an economist at the International Monetary Fund and then the European Investment Bank, was active in the conflict and negotiation field as a professor, consultant and researcher. He contributed to the establishment of negotiation research in France and beyond, writing extensively on negotiation, and inspiring a generation of conflict management scholars in the francophone world. A practitioner turned scholar, Dupont successfully bridged theory and practice, and can be considered as one of the thought leaders of our field. Many of his contributions are presented in this volume along with chapters from several well-known colleagues influenced by his work. This book inaugurates a new mini-series titled Careers in Negotiation and Conflict Management Research. It aims to honor outstanding scholars who have opened original paths in uncharted areas, as well as to shed new light on their legacy thanks to the contributions of colleagues. "This is a remarkable initiative concerning a prominent figure in negotiation research, Christophe Dupont. I was privileged to be a close colleague for more than three decades. His exceptional work on synthesis, classification, and framework development helped our academic community to organize the considerable amount of research published during the past few decades. An economist who ventured well beyond that discipline, his broad vision brought him into contact with scholars from sociology, psychology, and political science. These collaborations contributed in important ways to our understanding of the complex world that must be navigated by negotiators. This book, dedicated to his contributions to negotiation scholarship, is an excellent start for a ground-breaking series on thought leaders." Professor Guy-Olivier Faure, Sorbonne University & China Europe International Business School

"'Diversity' is a crucial concept describing the recent shift in minority studies from its focus on social stratification and inequality. In recent times, new theories and concepts that suggest 'positive' meanings are emerging. The focus is on empirically analyzing the mechanisms that produce alienation and discrimination as well as normatively exploring the social conditions that connect minority groups and social diversity to creativity and dynamism. Chapters in this volume delve into the status of women in Japan in relation to marriage and single motherhood, gendered roles and norms in the early modern period, the Japanese American reparation movement, Korean and Muslim ethnic minorities in Japan and the United Kingdom, mutual aid in Okinawa, and the role of NGOs and NPOs in fostering social diversity. This insightful work suggests that in order to broaden our understanding of minorities we should examine the ways in which these groups promote the enrichment of society."--Publisher's description.

Dans le contexte mondial de l'« Éducation pour tous », le continent africain doit relever plusieurs défis, parmi lesquels celui d'améliorer l'accès à l'école de tous les enfants en âge d'être scolarisés, tout en leur garantissant un enseignement de qualité. L'Initiative ELAN-Afrique, mise en œuvre par l'Organisation internationale de la Francophonie en partenariat avec l'Agence universitaire de la Francophonie, l'Agence française de développement et le ministère français des Affaires étrangères et du Développement international, accompagne les pays qui le souhaitent sur la voie d'une articulation entre les langues des élèves (langues premières, langues africaines) et la langue française qui, cinquante ans après les indépendances, demeure très majoritairement la langue de l'école africaine francophone. Les contributions réunies dans cet ouvrage sont des actes de colloque issus d'une manifestation scientifique internationale qui a rassemblé à l'université Paul-Valéry Montpellier une cinquantaine de contributeurs autour de ces questions. Elles sont organisées autour de sept thématiques pour une meilleure lisibilité : le lecteur pourra ainsi aborder la question des « transferts » (de compétences linguistiques ou cognitives), les chantiers de la formation des enseignants et des écritures curriculaires, se documenter sur les ressources pour l'enseignement multilingue et sur les pratiques pédagogiques effectives, mais aussi compléter ses connaissances à travers les éclairages émanant d'autres contextes éducatifs (Amérique latine, Caraïbe, Afrique australe, Maghreb, Liban). Un ensemble d'informations sur l'utilisation conjointe des langues africaines et du français pour la scolarisation en Afrique, qui intéressera aussi bien les étudiants, les chercheurs, les enseignants que les cadres éducatifs, les experts et les organismes bailleurs de fonds impliqués dans le processus

complexe d'introduction d'approches bi-plurilingues à l'école.

Aux yeux du grand public, le refinancement d'entreprises en difficulté est avant tout un moyen efficace de faire fortune pour les investisseurs. Cette activité, connue également sous le nom de capital-retournement, est pourtant le domaine d'exercice exclusif de hauts techniciens de la finance et du droit exploitant le droit de l'ingénierie financière. Cet ouvrage démystifie le capital-retournement tout en voulant améliorer sa pratique. Pour cela, l'aspect juridique de la levée des fonds fait l'objet d'une profonde analyse. À partir de celle-ci et du droit étranger, un nouveau type de fonds est élaboré : la Société de Libre Partenariat Simplifiée (SLPS). Il s'agit d'un limited partnership capable de rivaliser avec ses concurrents anglo-saxons et luxembourgeois. De nouveaux mécanismes financiers sont proposés tels que le gage croisé ou encore le cramdown. Le mécanisme de cotation de la Banque de France est repensé. Le CIRI s'y voit confier un rôle actif. Le refinancement participatif d'entreprises en difficulté est également au coeur de la réflexion. Enfin, un nouveau régime fiscal incitatif est proposé.

Grohl's powerhouse drumming, anthemic riffing and melodic brilliance have proved both thrilling and enduring, and he remains one of rock's most respected figures.
