

Death Scenes A Homicide Detectives Scrapbook A Scrapbook Of Noir Los Angeles

This collection contains never-before-published images of seminal LAPD cases, including the Black Dahlia murder, the Onion Field case, the Watts riots, the Manson murders, and more. Captions are culled from original police logs and newspaper accounts.

A leather-covered scrapbook containing carefully mounted photographs of murder victims arrives on Alex Delaware's doorstep. Alex summons the help of his best friend, LAPD detective Milo Sturgis. Each will soon be forced to confront their own personal demons.

James Patterson returns to the genre that made him famous with a #1 New York Times bestselling teen detective novel about the mysterious Angel family . . . and the dark secrets they're keeping from one another. On the night Malcolm and Maud Angel are murdered, Tandy Angel knows just three things: 1) She was the last person to see her parents alive. 2) The police have no suspects besides Tandy and her three siblings. 3) She can't trust anyone-maybe not even herself. As Tandy sets out to clear the family name, she begins to recall flashes of experiences long buried in her vulnerable psyche. These memories shed light on her family's dark secrets, and digging deeper into her powerful parents' affairs proves to be a disturbing and dangerous game. Who knows what any of the Angels are truly capable of? There are four ways to die, and only one of them requires an intruder. Suicides, accidental, and natural deaths can occur without any evidence from outside the room. But murders typically involve suspects external to the crime scene. If there's evidence of an outside intruder, homicide detectives have to prepare for a chase. Intruders turn death scenes into crime scenes. Join J. Warner Wallace, former atheist, seasoned cold-case detective, and popular national speaker as he tackles his most important case ... with you on the jury! With the expertise of a cold-case detective, J. Warner examines eight critical pieces of evidence in the "crime scene" of the universe to determine if they point to a Divine Intruder. If you have ever wondered if something (or someone) outside the natural realm created the universe and everything in it, this is the case for you.

Dr Albert P Cardarelli (University of Massachusetts, Boston) and Dr. Charles Wellford (University of Maryland, College Park) opened the conference by presenting their research to help illuminate the consequences of unsolved murders and the variables that have contributed to the decline in clearance rates. Their research revealed that the changing nature of crime, the decentralisation of police departments, and the rise in gang violence have all had an impact on the effectiveness of homicide investigations. Law enforcement executives, academics, attorneys, and federal government representatives addressed the different effective strategies that have been developed to combat these problems, including various management and personnel decisions, videotaping suspect interviews, considering the availability of eyewitness identification options (simultaneous line-ups versus sequential line-ups), DNA analysis, and using cold case units and crime analysts to increase clearance rates. Case studies presented at the conference highlighted both the strengths and weaknesses associated with various investigation techniques. A town hall forum allowed attendees to discuss variables that contribute to an effective homicide unit. A lively discussion ensued, with participants mainly focusing on the role of science and technology, specifically how technology may at first appear to complicate the process but ultimately assists law enforcement by fostering change and improving investigational methods.

Capturing the faces of the century's most notorious criminals and their shocking handiwork, "New York Noir" showcases 40 years of crime with over 130 stunning photos from the archives of New York's "Daily News."

Hollywood Death Scenes is the first book in a series of true crime and tragedy tour guides. With over 150 addresses, 200 detailed maps, 50 pictures of Hollywood's tragic figures, and more than 200 photographs of crime scenes as they appear today, Hollywood Death Scenes will transport the reader to the locations of Los Angeles's greatest tragedies. The reader will be able to peer inside the dark underbelly of this glamorous city from the safety and comfort of his or her own home. Hollywood Death Scenes will also give the adventurous explorer the necessary tools to experience firsthand some of Hollywood's most notorious landmarks. Whether for the armchair detective or the extreme thrill seeker, Hollywood Death Scenes will take the reader to the other side of the yellow crime scene tape. See the sties where such famous Hollywood luminaries as Marilyn Monroe, Phil Hartman, and River Phoenix met their untimely deaths. Witness the atrocities committed by some of the world's most infamous mass murderers. Stare in horror at extended looks into the country's most twisted serial killers such as The Night Stalker and The Hillside Stranglers. Understand the chaos wrought on an entire city by madman Charles Manson. Delve into the unsolved mysteries of the deaths of celebrities from Natalie Wood to The Black Dahlia. Hollywood Death Scenes lets the reader experience an important part of our culture's violent history, without the fear of being harmed.

Bestselling author Del Quentin Wilber tells the inside story of how a homicide squad---a dedicated, colorful team of detectives---does its almost impossible job Twelve homicides, three police-involved shootings and the furious hunt for an especially brutal killer--February 2013 was a good month for murder in suburban Washington, D.C. After gaining unparalleled access to the homicide unit in Prince George's County, which borders the nation's capital, Del Quentin Wilber begins shadowing the talented, often quirky detectives who get the call when a body falls. After a quiet couple of months, all hell breaks loose: suddenly every detective in the squad is scrambling to solve one shooting and stabbing after another. Meanwhile, the entire unit is obsessed with a stone-cold "red ball," a high-profile case involving a seventeen-year-old honor student attacked by a gunman who kicked down the door to her house and shot her in her bed. Murder is the police investigator's ultimate crucible: to solve a killing, a detective must speak for the dead. More than any recent book, A Good Month for Murder shows what it takes to succeed when the stakes couldn't possibly be higher.

The internationally acclaimed author of the L.A. Quartet and The Underworld USA Trilogy, James Ellroy, presents another literary masterpiece, this time a true crime murder mystery about his own mother. In 1958 Jean Ellroy was murdered, her body dumped on a roadway in a seedy L.A. suburb. Her killer was never found, and the police dismissed her as a casualty of a cheap Saturday night. James Ellroy was ten when his mother died, and he spent the next thirty-six years running from her ghost and attempting to exorcize it through crime fiction. In 1994, Ellroy quit running. He went back to L.A., to find out the truth about his mother--and himself. In My Dark Places, our most uncompromising crime writer tells what happened when he teamed up with a brilliant homicide cop to investigate a murder that everyone else had forgotten--and reclaim the mother he had despised, desired, but never dared to love. What ensues is a epic of loss, fixation, and redemption, a memoir that is also a history of the American way of violence. "Ellroy is more powerful than ever." --The Nation "Astonishing . . . original, daring, brilliant."

--Philadelphia Inquirer

"Death Scene Investigation: Procedural Guide is the answer to a long recognized dilemma: how to have every death investigated by an experienced death investigator." — Tom Bevel, author of Practical Crime Scene Analysis and Reconstruction and Bloodstain Pattern Analysis with an Introduction to Crime Scene Reconstruction, Third Edition Those tasked with investigating death scenes come from a variety of backgrounds and varying levels of experience. Death Scene Investigation: Procedural Guide gives the less experienced investigator the procedures for almost

any death scene imaginable while providing the seasoned investigator a ready reference for deaths occurring even under the most unusual of circumstances. It details the precise steps that need to be taken when processing and analyzing a death scene to ensure vital evidence is not lost and "red flags" are not missed. Using a bulleted format for quick and easy access, the book provides hands-on, concise instruction in a style friendly to a range of professionals. Topics discussed in this practical manual include: Initial response and scene evaluation. This section includes a death investigation decision tree to lead investigators to a preliminary cause of death. The section is broken down into natural, accidental, suicidal, and homicidal deaths. It also explores the role of the medical examiner and autopsy protocol. Recovery of human remains from open field, aquatic, and buried sites. This section also discusses estimating the time of death. Wound dynamics and mechanisms of injury. Manners of death include asphyxiation; sharp force, blunt force, and chopping injuries; handgun, rifle, and shotgun wounds; and explosive, thermal, and electrical injuries. Special death scene investigations. Discussions include child and infant death, sex-related death, and death scenes with multiple victims. Death scene management. This section covers documentation, sketching, photography and videography, special observations, and search procedures. Death scene evidence processing. Topics include bloodstain patterns, shooting scenes, and entomological, biological, trace, friction ridge, and impression evidence. An appendix contains precautions for handling bloodborne pathogens and 15 innovative worksheets for field use are available for download. Death scene responders who master the techniques in this volume will expedite solving the circumstances of the death and the closing of the case. Michael S. Maloney was interviewed in Volume 13 of Anil Aggrawal's Internet Journal of Forensic Medicine and Toxicology.

A Pulitzer Prize-winning reporter for the Los Angeles Times discusses the hundreds of murders that occur in the city each year, and focuses on the story of the dedicated group of detectives who pursue justice at any cost in the killing of Bryant Tennale.

Presents the various methods used to investigate a violent crime, discussing forensic science tactics, investigative procedures, and the use of technology, citing sources including, newspapers, magazines, and books.

Autoerotic Deaths: Practical Forensic and Investigative Perspectives is a collaboration between two internationally known experts who combine their extensive experience to present a scientific, modern view of autoerotic death complete with a wide variety of exquisite case histories, photographs, and investigator tips. Chief Medical Examiner Anny Sau

A detectives strange and gruesome scrapbook of photos.

The Nutshell Studies of Unexplained Death offers readers an extraordinary glimpse into the mind of a master criminal investigator. Frances Glessner Lee, a wealthy grandmother, founded the Department of Legal Medicine at Harvard in 1936 and was later appointed captain in the New Hampshire police. In the 1940s and 1950s she built dollhouse crime scenes based on real cases in order to train detectives to assess visual evidence. Still used in forensic training today, the eighteen Nutshell dioramas, on a scale of 1:12, display an astounding level of detail: pencils write, window shades move, whistles blow, and clues to the crimes are revealed to those who study the scenes carefully. Corinne May Botz's lush color photographs lure viewers into every crevice of Frances Lee's models and breathe life into these deadly miniatures, which present the dark side of domestic life, unveiling tales of prostitution, alcoholism, and adultery. The accompanying line drawings, specially prepared for this volume, highlight the noteworthy forensic evidence in each case. Botz's introductory essay, which draws on archival research and interviews with Lee's family and police colleagues, presents a captivating portrait of Lee.

A vast photographic record of the annals of crime featuring some of the 20th century's most infamous criminals and shocking crimes. It covers everything from arson, cannibalism, con men and headless corpses, to mass murderers, sabotage, victims and vital clues.

Individuals who perpetrate murder sometimes pose or reposition victims, weapons, and evidence to make it look like events happened in a different way than what actually transpired. Until now, there has been scarce literature published on crime scene staging. Crime Scene Staging Dynamics in Homicide Cases is the first book to look at this practice, p

More than 175 years of true crimes culled from the city's police blotter, told through startling, rarely seen images and insightful text by two NYPD officers and a NYC crime reporter. From atrocities that occurred before the establishment of New York's police force in 1845 through the terrorist attack on the World Trade Center in 2001 to the present day, this visual history is an insider's look at more than 80 real-life crimes that shocked the nation, from arson to gangland murders, robberies, serial killers, bombings, and kidnappings, including: Architect Stanford White's fatal shooting at Madison Square Garden over his deflowering of a teenage chorus girl. The anarchist bombing of Wall Street in 1920, which killed 39 people and injured hundreds more with flying shrapnel. The 1928 hit at the Park Sheraton Hotel on mobster Arnold Rothstein, who died refusing to name his shooter. Kitty Genovese's 1964 senseless stabbing, famously witnessed by dozen of bystanders who did not intervene. Son of Sam, a serial killer who eluded police for months while terrorizing the city, was finally apprehended through a simple parking ticket. Perfect for crime buffs, urban historians, and fans of Serial and Making of a Murderer, this riveting collection details New York's most startling and unsettling crimes through behind-the-scenes analysis of investigations and more than 500 revealing photographs.

Elegant period maps and compelling crime analysis illuminate this disquieting volume, which reexamines the most captivating and intriguing homicides of the nineteenth century. Organized geographically, the elements of each murder--from the prior movements of both killer and victim to the eventual location of the body--are meticulously replotted using archival maps and bespoke plans, taking readers on a perilous journey around the murder hot spots of the world. From the "French Ripper," Joseph Vacher, who roamed the French countryside brutally mutilating and murdering at least eleven people, to H. H. Holmes and his "Murder Castle" in Chicago, crime expert Dr. Drew Gray recounts the details of each case. His forensic examination uncovers both the horrifying details of the crimes themselves and the ingenious detective work that led to the capture of the murderers. Throughout the book, Gray highlights the development of police methods and technology, from the introduction of the police whistle to the standardization of the mug shot to the use of fingerprinting and radiotelegraphy in apprehending criminals. Vividly recreating over one hundred individual murder cases through historic maps, photographs, newspaper excerpts, court papers, and police reports, Murder Maps is perfect for everyone interested in criminal history, forensics, or the macabre.

The most common triggers for homicide are fear, rage, revenge, money, lust, and, more rarely, sheer madness. This isn't an exact science, of course. Any given murder can have multiple

triggers. Sex and revenge seem to be common partners in crime. Rage, money, and revenge make for a dangerous trifecta of triggers, as well. This book offers my memories of homicide cases that I investigated or oversaw. In each case, I examine the trigger that led to death. I chose this theme for the book because even though the why of a murder case may not be critical in an investigation, it can sometimes lead us to the killer. And even if we solve a case without knowing the trigger, the why still intrigues us, disrupting our dreams and lingering in our minds, perhaps because each of us fears the demons that lie within our own psyche—the triggers waiting to be pulled.

Death Investigator's Handbook quickly became an essential addition to every law enforcement library when it was first published in 1993. Ten years later, veteran homicide investigator Louis Eliopoulos completely updated and expanded it to include all the latest scientific and technological advances in the field of death investigation, including DNA, cold cases, bioterrorism, mass-disaster sites, trace evidence recovery, blood spatter, forensic odontology and much more. To make the manual handier for working professionals, we have divided the book into three separate volumes: crime scenes (Volume 1), investigations (Volume 2), and scientific investigations (Volume 3). If you want to know more about the art and science of crime-scene processing, forensic evaluations and investigative techniques, go to the source that professional use to catch real killers.

Winner of the 2018 Anthony Award for Best First Novel Winner of the 2017 Agatha Award for Best First Novel Also a Lefty Award Winner and a Barry Award-Nominated Title The Surprise Hit of the Season! Actress Dayna Anderson's Deadly New Role: Homicide Detective Dayna Anderson doesn't set out to solve a murder. All the semifamous, mega-broke actress wants is to help her parents keep their house. So after witnessing a deadly hit-and-run, she pursues the fifteen grand reward. But Dayna soon finds herself doing a full-on investigation, wanting more than just money—she wants justice for the victim. She chases down leads at paparazzi hot spots, celeb homes, and movie premieres, loving every second of it—until someone tries to kill her. And there are no second takes in real life. Praise: "[A] winning first novel and series launch...Garrett writes with humor and insight about the Hollywood scene. Readers will look forward to Day's further adventures."—Publishers Weekly (starred review) "A smart, sassy debut, introducing an appealing protagonist with amusing friends."—Library Journal (starred review) and Debut of the Month "Veteran TV writer Garrett uses her Cold Case experience to inform her debut, which sets up more than one charming character and isn't afraid to go cynical on all things LA."—Kirkus Reviews "Funny, lively characters populate this new Detective by Day series...this will be an entertaining entry into the amateur sleuth genre."—RT Book Reviews "Fun, smart, endearingly flawed, and impressively determined, Dayna Anderson is a heroine readers will fall in love with...I relished every unexpected twist and turn of this highly entertaining mystery!"—Kyra Davis, New York Times bestselling author

One of the Midwest's most accomplished homicide detectives reveals the secrets behind his most notorious cases. Part memoir, part police procedural, and part true crime anthology, *Death as a Living* reveals the inside world of homicide and death investigation—the triumph, tragedy, humor, and truly bizarre situations one finds when working that beat. For more than thirty years, involving more than one thousand cases, Burke has worked as a death investigator—first with the Dayton, Ohio police department, then with a county coroner's office. In *Death as a Living*, he shares his tricks of the trade: how detectives solve cases, what they look for, the importance of forensic science, and the irreplaceable value of instinct. Along the way, Burke offers humorous trial anecdotes, thoughts on race and policing, stories about the fatal toll stress took on fellow officers, and, perhaps most movingly, details about the three fatal shootings of police officers—one of them one of his first friends at the department, another the son of his sergeant—that shaped his career.

We hold many assumptions about police work—that it is the responsibility of the state, or that police officers are given the right to kill in the name of public safety or self-defense. But in *The Killing Consensus*, Graham Denyer Willis shows how in São Paulo, Brazil, killing and the arbitration of “normal” killing in the name of social order are actually conducted by two groups—the police and organized crime—both operating according to parallel logics of murder. Based on three years of ethnographic fieldwork, Willis's book traces how homicide detectives categorize two types of killing: the first resulting from “resistance” to police arrest (which is often broadly defined) and the second at the hands of a crime “family” known as the Primeiro Comando da Capital (PCC). Death at the hands of police happens regularly, while the PCC's centralized control and strict moral code among criminals has also routinized killing, ironically making the city feel safer for most residents. In a fractured urban security environment, where killing mirrors patterns of inequitable urbanization and historical exclusion along class, gender, and racial lines, Denyer Willis's research finds that the city's cyclical periods of peace and violence can best be understood through an unspoken but mutually observed consensus on the right to kill. This consensus hinges on common notions and street-level practices of who can die, where, how, and by whom, revealing an empirically distinct configuration of authority that Denyer Willis calls sovereignty by consensus.

NEW YORK TIMES BOOK REVIEW EDITORS' CHOICE • In this “spellbinding memoir” (The Washington Post), a private investigator revisits the case that has haunted her for decades and sets out on a deeply personal quest to sort truth from lies. “Beautifully written.”—Heather Ann Thompson, Pulitzer Prize-winning author of *Blood in the Water* In 1990, Ellen McGarrah was a young reporter for the Miami Herald when she covered the execution of Jesse Tafero, a man convicted of murdering two police officers. When it later emerged that Tafero may have been innocent, McGarrah was appalled by her unquestioning acceptance of the state's version of events. The revelation propelled her into a new career as a private investigator. Decades later, McGarrah finally decides to find out the truth of what really happened in Florida. Her investigation plunges her back into the Miami of the 1960s and 1970s, a dangerous world of nightclubs, speed boats, and cartels, all awash in violence. She combs through stacks of court files and interviews everyone involved in the case. But even as McGarrah circles closer to the truth, the story of guilt and innocence becomes more complex, and she gradually discovers that she hasn't been alone in her need for closure. Because whenever a human life is forcibly taken—by bullet, or by electric chair—the reckoning is long and difficult for all. A fascinating glimpse into the mind of a private investigator, *Two Truths and a Lie* is ultimately a deeply personal exploration of one woman's quest to find answers in a chaotic world.

A captivating blend of history, women in science, and true crime, *18 Tiny Deaths* tells the story of how one woman changed the face of forensics forever. Frances Glessner Lee, born a socialite to a wealthy and influential Chicago family in the 1870s, was never meant to have a career, let alone one steeped in death and depravity. Yet she developed a fascination with the investigation of violent crimes, and made it her life's work. Best known for creating the Nutshell Studies of Unexplained Death, a series of dollhouses that appear charming—until you notice the

macabre little details: an overturned chair, or a blood-spattered comforter. And then, of course, there are the bodies—splayed out on the floor, draped over chairs—clothed in garments that Lee lovingly knit with sewing pins. *18 Tiny Deaths*, by official biographer Bruce Goldfarb, delves into Lee's journey from grandmother without a college degree to leading the scientific investigation of unexpected death out of the dark confines of centuries-old techniques and into the light of the modern day. Lee developed a system that used the Nutshells dioramas to train law enforcement officers to investigate violent crimes, and her methods are still used today. The story of a woman whose ambition and accomplishments far exceeded the expectations of her time, *18 Tiny Deaths* follows the transformation of a young, wealthy socialite into the mother of modern forensics... "Eye-opening biography of Frances Glessner Lee, who brought American medical forensics into the scientific age...genuinely compelling."—Kirkus Reviews "A captivating portrait of a feminist hero and forensic pioneer." —Booklist

A deeply-reported, riveting account of a cold case murder in Los Angeles, unsolved until DNA evidence implicated a shocking suspect – a female detective within the LAPD's own ranks. On February 24, 1986, 29-year-old newlywed Sherri Rasmussen was murdered in the home she shared with her husband, John. The crime scene suggested a ferocious struggle, and police initially assumed it was a burglary gone awry. Before her death, Sherri had confided to her parents that an ex-girlfriend of John's, a Los Angeles police officer, had threatened her. The Rasmussens urged the LAPD to investigate the ex-girlfriend, but the original detectives only pursued burglary suspects, and the case went cold. DNA analysis did not exist when Sherri was murdered. Decades later, a swab from a bite mark on Sherri's arm revealed her killer was in fact female, not male. A DNA match led to the arrest and conviction of veteran LAPD Detective Stephanie Lazarus, John's onetime girlfriend. *The Lazarus Files* delivers the visceral experience of being inside a real-life murder mystery. McGough reconstructs the lives of Sherri, John and Stephanie; the love triangle that led to Sherri's murder; and the homicide investigation that followed. Was Stephanie protected by her fellow officers? What did the LAPD know, and when did they know it? Are there other LAPD cold cases with a police connection that remain unsolved?

Serial killings, child abductions, organised crime hits and domestic murders. This is the memoir of a homicide detective. Here I am: tall and broad, shaved head, had my nose broken three times fighting. Black suit, white shirt, the big city homicide detective. I've led investigations into serial killings, child abductions, organised crime hits and domestic murders. But beneath the suit, I've got an Om symbol in the shape of a Buddha tattooed on my right bicep. It balances the tattoo on my left ribs: Better to die on your feet than live on your knees. That's how I choose to live my life. As a cop, I got paid to catch killers and I learned what doing it can cost you. It cost me marriages and friendships. It cost me my reputation. They tell you not to let a case get personal, but I think it has to. Each one has taken a piece out of me and added a piece, until there's only pieces. I catch killers - it's what I do. It's who I am. Gary Jubelin was one of Australia's most celebrated detectives, leading investigations into the disappearance of preschooler William Tyrrell, the serial killing of three Aboriginal children in Bowraville and the brutal gangland murder of Terry Falconer. During his 34-year career, Detective Chief Inspector Jubelin also ran the crime scene following the Lindt Cafe siege, investigated the death of Caroline Byrne and recovered the body of Matthew Leveson. Jubelin retired from the force in 2019. This is his story

Written by an L. A. County homicide detective and former atheist, *Cold-Case Christianity* examines the claims of the New Testament using the skills and strategies of a hard-to-convince criminal investigator. Christianity could be defined as a "cold case": it makes a claim about an event from the distant past for which there is little forensic evidence. In *Cold-Case Christianity*, J. Warner Wallace uses his nationally recognized skills as a homicide detective to look at the evidence and eyewitnesses behind Christian beliefs. Including gripping stories from his career and the visual techniques he developed in the courtroom, Wallace uses illustration to examine the powerful evidence that validates the claims of Christianity. A unique apologetic that speaks to readers' intense interest in detective stories, *Cold-Case Christianity* inspires readers to have confidence in Christ as it prepares them to articulate the case for Christianity.

Those tasked with investigating crime scenes come from a variety of backgrounds and varying levels of experience. *Crime Scene Investigation Procedural Guide* gives the novice investigator the procedures for almost any crime scene imaginable while providing the seasoned pro a ready reference for crimes occurring even under the most unusual of circumstances

Cloyd Steiger worked the streets of Seattle as a Homicide Detective for 22 years of his 36 year career. During that time he worked some of the most notorious murders in Seattle, from serial murderers, domestic terrorists and psychotic killers. In his true crime memoir, *Homicide: The View from Inside the Yellow Tape*, he describes some of the most interesting murders he's worked on. Often shocking, often inane and even funny, it's a view you won't see on the evening news. A look inside the yellow tape; inside the interrogation room, where you come face to face with pure evil, and see what it's like to investigate murder.

FINALIST FOR THE J. ANTHONY LUKAS BOOK PRIZE NATIONAL BESTSELLER Named One of The Best Books of 2020 by NPR's Fresh Air * Publishers Weekly * Marie Claire * Redbook * Vogue * Kirkus Reviews * Book Riot * Bustle A Recommended Book by The New York Times * The Washington Post * Publisher's Weekly * Kirkus Reviews* Booklist * The Boston Globe * Goodreads * BuzzFeed * Town & Country * Refinery29 * BookRiot * CrimeReads * Glamour * Popsugar * PureWow * Shondaland Dive into a "tour de force of investigative reporting" (Ron Chernow): a "searching, atmospheric and ultimately entrancing" (Patrick Radden Keefe) true crime narrative of an unsolved 1969 murder at Harvard and an "exhilarating and seductive" (Ariel Levy) narrative of obsession and love for a girl who dreamt of rising among men. You have to remember, he reminded me, that Harvard is older than the U.S. government. You have to remember because Harvard doesn't let you forget. 1969: the height of counterculture and the year universities would seek to curb the unruly spectacle of student protest; the winter that Harvard University would begin the tumultuous process of merging with Radcliffe, its all-female sister school; and the year that Jane Britton, an ambitious twenty-three-year-old graduate student in Harvard's Anthropology Department and daughter of Radcliffe Vice President J. Boyd Britton, would be found bludgeoned to death in her Cambridge, Massachusetts apartment. Forty years later, Becky Cooper a curious undergrad, will hear the first whispers of the story. In the first telling the body was nameless. The story was this: a Harvard student had had an affair with her professor, and the professor had murdered her in the Peabody Museum of Archaeology and Ethnology because she'd threatened to talk about the affair. Though the rumor proves false, the story that unfolds, one that Cooper will follow for ten years, is even more complex: a tale of gender inequality in academia, a 'cowboy culture' among empowered male elites, the silencing effect of institutions, and our compulsion to rewrite the stories of female victims. *We Keep the Dead Close* is a memoir of mirrors, misogyny, and murder. It is at once a rumination on the violence and oppression that rules our revered institutions, a ghost story reflecting one young woman's past onto another's present, and a love story for a girl who was lost to history.

Unlike other such manuals, this one combines specialized info from dozens of scientific and investigative references in one handy volume. A must for detectives, pathologists, attorneys, crime scene technicians, reporters, EMTs, PIs and mystery buffs.

“It is always a treat to read a Nero Wolfe mystery. The man has entered our folklore.”—The New York Times Book Review Introduction by David Handler It wasn't Leonard Dykes's writing style that offended. But something in his unpublished tome seemed to lead everyone who read it to a very unhappy ending. Now four people are dead, including the unfortunate author himself, and the police think Nero Wolfe is the only man who can close the book on this novel killer. So the genius sleuth directs his sidekick to set a trap . . . and discovers that the truth is far stranger—and far bloodier—than fiction. A grand master of the form, Rex Stout is one of America's greatest mystery writers, and his literary creation Nero Wolfe is one of the greatest fictional detectives of all time. Together, Stout and Wolfe have entertained—and puzzled—millions of mystery fans around the world. Now, with his perambulatory man-about-town, Archie Goodwin, the arrogant, gourmandizing, sedentary sleuth is back in the original seventy-three cases of crime and detection written by the inimitable master himself, Rex Stout.

When Stacey arrived at Bill Bateman's for her 5 year class reunion, she had no idea how a memory from her past would alter her future. In one innocent moment, a simple cordial act leads one on a path of jealous rage and another fighting for their life. Tempers flare, threats are exchanged, blood is shed, and the services of the homicide detectives are soon requested. In his second release, former homicide detective and award-winning author, Ken Lang, unveils the inner workings of a chaotic homicide unit. Standing In Death's Shadows: More True Stories from a Homicide Detective is a fascinating and revealing read that throws you right into the conflict between the victims, their killers, and the detectives who are tasked to solve their murders. A rare insider account of the exhilarating pace of a homicide detective's life, Standing In Death's Shadows: More True Stories from a Homicide Detective is a true crime adventure that thrusts you into the middle of the action and will leave you with wanting more.

The US Department of Justice's National Institute of Justice (NIJ) asked the Institute of Medicine (IOM) of The National Academies to conduct a workshop that would examine the interface of the medicolegal death investigation system and the criminal justice system. NIJ was particularly interested in a workshop in which speakers would highlight not only the status and needs of the medicolegal death investigation system as currently administered by medical examiners and coroners but also its potential to meet emerging issues facing contemporary society in America. Additionally, the workshop was to highlight priority areas for a potential IOM study on this topic. To achieve those goals, IOM constituted the Committee for the Workshop on the Medicolegal Death Investigation System, which developed a workshop that focused on the role of the medical examiner and coroner death investigation system and its promise for improving both the criminal justice system and the public health and health care systems, and their ability to respond to terrorist threats and events. Six panels were formed to highlight different aspects of the medicolegal death investigation system, including ways to improve it and expand it beyond its traditional response and meet growing demands and challenges. This report summarizes the Workshop presentations and discussions that followed them.

Life as a homicide detective is a fast-paced whirlwind down death's corridor. In the final installment of an extraordinary glimpse into the innermost workings of a homicide unit, Death Comes Uninvited carries you through the rigorous pace of a homicide detective's life. Race from scene to scene with the detectives in ten different cases as evidence leads these detectives throughout one of the most violent cities in the country—Baltimore. As detectives rush under the gun to identify and capture these ruthless killers, pressure from the administration builds to a contentious boiling point that leaves unrest within the unit. ABOUT THE AUTHOR: Ken Lang is a former homicide detective and an award-winning author of several true crime books, including Walking Among the Dead, Standing In Death's Shadow, and Death Comes Uninvited. In 2011, he was named one of 50 Great Writers You Should Be Reading by The Author's Show. New York Times bestselling author Julia Spencer-Fleming says, “Ken Lang is the real deal—a cop with chops!” Ken resides in North East, Maryland with his wife and three children. To learn more about his true crime books and upcoming crime novels visit his website at www.kenlangstudios.com.

When night falls on New York, the shadows are everywhere and death wears many faces. How the victims leave their bodies is deeply personal, but the witnesses to their death and the factors that brought it about belong to the public world—a somber world which is encapsulated in this gruesome survey of crime and violence in the 1910s. Parts of the city that are today among its trendiest neighborhoods were once the battlegrounds of evil forces, which left their mark in unforgettable ways. Here, newspaper clippings, police reports and testimonies are placed alongside the scenes that they describe, fleshing them out and giving life to the departed. Complete with an introduction from German actor and writer Joe Bausch, this book is a must for anyone who has ever anxiously imagined how dark an activity like dying can be—and isn't that everyone?

The strange and gruesome crime-scene snapshot collection of LAPD detective Jack Huddleston spans Southern California in its noir heyday. Death Scenes is the noted forerunner of several copycat titles.
