Food stores always propose you such a choice of different protein bars with more and more amazing tastes but can we really trust them that they will do the job you expect them to do for your diet and your health! The advantage of the protein bar is that it is convenient to slip into your gym bag or pocket. It is you who decides whether the protein bar is a simple snack for you or a replacement for your meal. So it is very important to know what exactly you are eating and whether what you chose for your meal will do exactly what your body needs. So, be careful not to fall into the trap of some brands who bet everything on the marketing rather than on the composition of their bars. It is important to read the nutritional values of protein bars because they don't always seem to be what they are. Even with a healthy and varied list of ingredients, the sugar content should not be more than 30gr, which is the equivalent of two tablespoons, especially if there are other ingredients like dried fruits that add more sugar without being noticed. Similarly, a very long list of ingredients is unnecessary and is more deceitful than anything else. So, if you are careful and read nutrition labels and ingredients lists, it is possible that you will discover that actually you are not consuming what you think you do. The best in this case is to make your own homemade protein bars. For the purpose to avoid all confusions with ingredients and trust you are really following your protein diet get this DIY Protein Bar Cookbook and start having fun with your training sessions without fear of not having the right balance of protein.

Protein is essential for muscle growth, repair and maintenance, but it is also necessary for maintaining blood pressure, fluid balance and electrolyte levels within the human body. Each recipe in this cookbook includes a nutrition label so you can see how many calories, and how many grams of fat, carbs and protein are in each serving. No matter what, though, there are options for everyone's nutritional preferences: sugar-free, refined sugar-free, cholesterol-free, low-calorie, low-sodium, high fiber and high protein. These recipes might be "free" of some stuff, but they sure aren't free of flavor! Oh, and don't you worry, the fun doesn't stop there. Every recipe in this cookbook is all-natural -- no artificial sweeteners, no synthetic food dyes, no artificial food flavorings, no hydrogenated oils and no preservatives whatsoever. That list right there is unheard of when it comes to store-bought protein bars. These protein bars are perfect for both pro and novice athletes. After an intense workout, they're the best reward for sweating like an animal, dealing with your exhausted muscles, and trying to control those damn uncontrollable jelly legs. But that's not all. Protein bars aren't only for the workoutaholics... Do you have a sweet tooth? Did you just raise your hand? Then these protein bars are for you too. They taste like candy bars (seriously, just check out the Candy Bar Protein Bar section on pg. 60-81) but without all the excess calories, fat, salt, sugar, artificial additives and preservatives.
