The Ape that Understood the Universe is the story of the strangest animal in the world: the human animal. It opens with a question: How would an alien scientist view our species? What would it make of our sex differences, our sexual behavior, our altruistic tendencies, and our culture? The book tackles these issues by drawing on two major schools of thought: evolutionary psychology and cultural evolutionary theory. The guiding assumption is that humans are animals, and that like all animals, we evolved to pass on our genes. At some point, however, we also evolved the capacity for culture - and from that moment, culture began evolving in its own right. This transformed us from a mere ape into an ape capable of reshaping the planet, travelling to other worlds, and understanding the vast universe of which we're but a tiny, fleeting fragment. Featuring a new foreword by Michael Shermer.

INTRODUCTION Do you usually say, "I have to do it / I should do it", instead of freely choosing if you want to do a certain activity? If you answered yes, then you are not following the path of essentialism. This book, written by Greg McKeown, studies essentialism, a systematic discipline that seeks to locate the most essential tasks of a particular activity. This approach allows for a more planned and easier execution of your routine, since it will eliminate everything that is unnecessary. The aim of the author is to help us discover what is fundamental, essential, a thought

that will allow us to have a more useful and productive life. If we define essentialism in a few words, we would say that it is the art of doing less but with a better outcome. In other words, the idea is to do the essentials and make smarter use of your time, energy and resources. Essentialism seeks to achieve few but significant achievements, instead of having many of little relevance. But how do we distinguish between the relevant and the irrelevant, the necessary from the unnecessary? We must learn to simplify our lives. It may seem like an unrealistic postulate, but let's reflect a little on this. To work in current societies and achieve a good standard of living with better opportunities, people's work schedules tend to be excessive. We are bombarded with this idea of abundance, resulting in our feeling that we must have everything, but can we? Evidently, not. We cannot know everything, and we cannot have all the tools and if we did, it doesn't mean that we would be happy. If we analyze this thought of abundance, you will see that there are many things or activities that become unnecessary, simply because you do not have the time to make use of them. For this reason, it is better that we focus on what we should do, on what is fundamental to our happiness and our success. These arguments are based on McKeown's background as a business coach and his own personal experiences. He proposes that if we focus on "less, but better" our progress will be huge, because we will be directing our efforts in one direction, instead of dividing it into thousands of directions. In this text you will learn to identify the essential things in your life and how you can eliminate unnecessary activities. This process seems very simple and trivial, but it will allow you to develop a greater mental and emotional strength, and an attitude that will greatly improve your performance. In addition, focusing only on the essentials allows us to be clearer in our objectives and our decision making is better. Although it seems hard to believe, our decision-making ability is undermined by the overwhelming feeling of having too much to do. And this path leads to one place: having a life full of passivity.

Look out for Daniel Pink's new book, *When: The Scientific Secrets of Perfect Timing* #1 New York Times Business Bestseller #1 Wall Street Journal Business Bestseller #1 Washington Post bestseller From the bestselling author of *Drive* and *A Whole New Mind*, and teacher of the popular MasterClass on Sales and Persuasion, comes a surprising--and surprisingly useful--new book that explores the power of selling in our lives. According to the U.S. Bureau of Labor Statistics, one in nine Americans works in sales. Every day more than fifteen million people earn their keep by persuading someone else to make a purchase. But dig deeper and a startling truth emerges: Yes, one in nine Americans works in sales. But so do the other eight. Whether we're employees pitching colleagues on a new idea, entrepreneurs enticing funders to invest, or parents and teachers cajoling children to study, we spend our days trying to move others. Like it or not, we're all in sales now. *To Sell Is Human* offers a fresh look at the art and science of selling. As he did in *Drive* and *A Whole New Mind*, Daniel H. Pink draws on a rich trove of social science for his counterintuitive insights. He reveals the new ABCs of moving others (it's no longer "Always Be Closing"), explains why extraverts don't make the best salespeople, and shows how giving people an "off-ramp" for their actions can matter more than actually changing their minds. Along the way, Pink describes the six successors to the elevator pitch, the three rules for understanding another's perspective, the five frames that can make your message clearer and more persuasive, and much more. The result is a perceptive and practical book--one that will change how you see the world and transform what you do at work, at school, and at home.

empowers us to reclaim control of our own choices about where to spend our precious time and energy - instead of giving others the implicit permission to choose for us. Essentialism is not one more thing - it's a whole new way of doing everything. Now with a new chapter that focuses on what great bosses really do. Dr. Sutton reveals new insights that he's learned since the writing of Good Boss, Bad Boss. Sutton adds revelatory thoughts about such legendary bosses as Ed Catmull, Steve Jobs, A.G. Lafley, and many more, and how you can implement their techniques. If you are a boss who wants to do great work, what can you do about it? Good Boss, Bad Boss is devoted to answering that question. Stanford Professor Robert Sutton weaves together the best psychological and management research with compelling stories and cases to reveal the mindset and moves of the best (and worst) bosses. This book was inspired by the deluge of emails, research, phone calls, and conversations that Dr. Sutton experienced after publishing his blockbuster bestseller The No Asshole Rule. He realized that most of these stories and studies swirled around a central figure in every workplace: THE BOSS. These heart-breaking, inspiring, and sometimes funny stories taught Sutton that most bosses - and their followers - wanted a lot more than just a jerk-free workplace. They aspired to become (or work for) an all-around great boss, somebody with the skill and grit to inspire superior work, commitment, and dignity among their charges. As Dr. Sutton digs into the nitty-gritty of what the best (and worst) bosses do, a theme runs throughout Good Boss, Bad Boss - which brings together the diverse lessons and is a hallmark of great bosses: They work doggedly to "stay in tune" with how their followers (and superiors, peers, and customers too) react to what they say and do. The best bosses are acutely aware that their success depends on having the self-awareness to control their moods and moves, to accurately interpret their impact on others, and to make adjustments on the fly that continuously spark effort, dignity, and pride among their people.

From one of the sharpest Christian voices of her generation and host of the podcast Relatable comes a framework for escaping our culture of trendy narcissism—and embracing God instead. We're told that the key to happiness is self-love. Instagram influencers, mommy bloggers, self-help gurus, and even Christian teachers promise that if we learn to love ourselves, we'll be successful, secure, and complete. But the promise doesn't deliver. Instead of feeling fulfilled, our pursuit of self-love traps us in an exhausting cycle: as we strive for self-acceptance, we become addicted to self-improvement. The truth is we can't find satisfaction inside ourselves because we are the problem. We struggle with feelings of inadequacy because we are inadequate. Alone, we are not good enough, smart enough, or beautiful enough. We're not enough--period. And that's okay, because God is. The answer to our insufficiency and insecurity isn't self-love, but God's love. In Jesus, we're offered a way out of our toxic culture of self-love and into a joyful life of relying on him for wisdom, satisfaction, and purpose. We don't have to wonder what it's all about anymore. This is it. This book isn't about battling your not-enoughness; it's about embracing it. Allie Beth Stuckey, a Christian, conservative new mom, found herself at the dead end of self-love, and she wants to help you combat the false teachings and self-destructive mindsets that got her there. In this book, she uncovers the myths popularized by our self-obsessed culture, reveals where they manifest in politics and the church, and dismantles them with biblical truth and practical wisdom.

It's normal to feel overwhelmed by the hard things in life, but lately doesn't it seem like we're feeling this way a lot more often than we used to? The problem isn't a lack of motivation or effort, but that motivation and effort are limited resources. The more we deplete them, the more burnt out we get, making it even harder to produce the results we want. In 'Effortless', Greg McKeown show us how to make essential tasks easier so that we can accomplish more of what matters, without burning out. From the author of 'Essentialism'.

Wall Street Journal Bestseller "The pick of 2014's management books." –Andrew Hill, Financial Times "One of the top business books of the year." –Harvey Schacter, The Globe and Mail Bestselling author, Robert Sutton and Stanford colleague, Huggy Rao tackle a challenge that determines every organization's success: how to scale up farther, faster, and more effectively as an organization grows. Sutton and Rao have devoted much of the last decade to uncovering what it takes to build and uncover pockets of exemplary performance, to help spread them, and to keep recharging organizations with ever better work practices. Drawing on inside accounts and case studies and academic research from a wealth of industries-- including start-ups, pharmaceuticals, airlines, retail, financial services, high-tech, education, non-profits, government, and healthcare-- Sutton and Rao identify the key scaling challenges that confront every organization. They tackle the difficult trade-offs that organizations must make between whether to encourage individualized approaches tailored to local needs or to replicate the same practices and customs as an organization or program expands. They reveal how the best leaders and teams develop, spread, and instill the right mindsets in their people-- rather than ruining or watering down the very things that have fueled successful growth in the past. They unpack the principles that help to cascade excellence throughout an organization, as well as show how to eliminate destructive beliefs and behaviors that will hold them back. Scaling Up Excellence is the first major business book devoted to this universal and vexing challenge and it is destined to

become the standard bearer in the field.

Stuffocation is a movement manifesto for “experiential” living, a call to arms to stop accumulating stuff and start accumulating experiences, and a road map for a new way forward with the potential to transform our lives. Reject materialism. Embrace experientialism. Live more with less. Stuffocation is one of the most pressing problems of the twenty-first century. We have more stuff than we could ever need, and it isn’t making us happier. It’s bad for the planet. It’s cluttering up our homes. It’s making us stressed—and it might even be killing us. A rising number of us are already turning our backs on all-you-can-get consumption. We are choosing access over ownership, and taking our business to companies like Zipcar, Spotify, and Netflix. Fed up with materialism, we are ready for a new way forward. Trend forecaster James Wallman traces our obsession with stuff back to the original Mad Men, who first created desire through advertising. He interviews anthropologists studying the clutter crisis, economists searching for new ways of measuring progress, and psychologists who link stuffocation to declining well-being. And he introduces us to the innovators who are already living more consciously and with more meaning by choosing experience over stuff. Experientialism does not mean giving up all of our possessions. It is a solution that is less extreme but equally fundamental. It’s about transforming what we value. Stuffocation is a paradigm-shifting look at our habits and an inspiring call for living more with less. It’s the one important book you won’t be able to live without. Praise for Stuffocation “The revelations come fast and furious as he asserts that acquiring ‘stuff’ is often just an easy way to ignore the tougher questions of life, dodging ‘why am I here?’ and ‘how should I live?’ for ‘will that go with the top I bought last week?’ Tart and often funny . . .

[Stuffocation] will be an eye-opener for those long ago persuaded that more is better. A scintillating read that will provoke conversation (or at least closet cleaning).”—Booklist “James Wallman deftly hits upon a major insight for our times: that acquiring ‘stuff’ and ‘things’ is not nearly as meaningful as collecting experiences. Some of the happiest days of my life were when I had nothing and lived on a houseboat. Without stuff to tie me down, I felt completely free.”—Blake Mycoskie, founder of TOMS and author of the New York Times bestseller Start Something That Matters “A must-read . . . We think that more stuff will make us happier, but as the book nicely shows, we’re just plain wrong. A great mix of stories and science, Stuffocation reveals the downside of more, and what we can do about it.”—Jonah Berger, author of the New York Times bestseller Contagious “Wallman offers a deeply important message by weaving contemporary social science into very engaging stories. Reading the book is such a pleasure that you hardly recognize you’re being told that you should change how you live your life.”—Barry Schwartz, author of The Paradox of Choice “With a sociologist’s eye and a storyteller’s ear, Wallman takes us on a tour of today’s experience economy from the perspective not of businesses, nor even of consumers per se, but of everyday people.”—B. Joseph Pine II and James H. Gilmore, authors of The Experience Economy
