W. D. Gann's justly famous work on the trading of commodities. "I am writing this book to supply a universal demand: and give rules that will forecast the trend of commodities. Conditions have changed rapidly during the last few years and will change more rapidly after this great war is over than ever before in history. Men will return to the soil of Mother Nature to make a living. Investors and speculators will have to look for new ways to make money in the future and will find it more difficult in the stock market; therefore, the necessities of life, the basic commodities, will offer greater opportunities than investments in stocks and bonds, providing the trader knows the rules to follow. "My object is to write something that will be helpful to people in trade lines and to those who have long years of experience in the commodity market, as well as the inexperienced trader who wants knowledge and needs to learn the ways to start right, and to protect his capital and make profits. Life affords no greater pleasure than that of helping others who are trying to help themselves. "I am going to give the best of my forty years of experience in this book, and I hope to show others the way to help themselves and follow mathematical rules in the commodity market, which will result in profits. I do not believe in gambling or reckless speculation, but am firmly convinced, after years of experience, that if traders will follow rules and trade on definite indications, that speculation can be made a profitable profession. Trading in commodities is not a gambling business, as some people think, but a practical, safe business when conducted on business principles. "I offer

To make a success trading in stocks every man should learn everything he can about the stock market and the ways to operate in the market in order to make the greatest success. He should learn to take the smallest risk possible and then try to make the greatest profits possible. The more a man studies and learns the greater success he will have. We quote Proverbs 1: 5- "The wise man will Increase learning." Again, Proverbs 2: 11- "Discretion shall preserve these; understanding shall keep thee." Proverbs 3: 9- "Give instructions to a wise man and he will become wiser. Teach a just man and he will increase in learning." The "Book of the Lambs" says that the fear of the market is the beginning of knowledge. Many people do not realize that without preparation and knowledge the stock market is dangerous and that it is easier to make losses than it is to make profits. However, the risks in stock speculation or investment are no greater than in any other line of business if you understand and apply the proper rules to speculative trading, and the profits compared to risks are greater than in any other business.
