Only the Faces Change is a humorous, touching story of teachers, both good and bad, of students searching for truth in education and in their personal lives, and of failed bureaucratic attempts to improve the system. Herb Williams encourages students to speak for themselves through discussions and notes (Dear Herbies) from a coffee can; satirizes directives from principals, counselors, attendance supervisors, and parents; solicits contributions from colleagues (From the Campus Inn); incorporates the latest rumors from one who knows them all (The Ear With an Attitude); and integrates satirical columns from his newspaper days (Fiction and Fact from the Almanac). For over fifteen years, Herb Williams wrote a humor column, titled "Life and Times," published in three different newspapers in Norwalk, Cerritos, and Redlands, California. This is his third book in addition to his travel memoir, North to Alaska with a No-Account Cat and his "how to" booklet, Easy Writing Across the Curriculum or Anywhere Else.

This is book 2 of the Evelina series. Things get even hot. Raised stakes and a matter of life or death. Mankind's existence rest on the shoulders of one woman. The Omega. The first woman has become the last woman. The only true seal. What if it was all planned before this world was created? To save all humanity, mankind must find the only true key; the Omega. On the other hand, to restore the lost kingdom of darkness, the devil must find the most wanted catalyst; The Omega. When everyone's fate is in your hands what are the risks to yourself? It is a dash against time as total obliteration of the losing team is imminent and inevitable. It is a story of courage, steadfast and honor in the face of death. When loyalty is tested to breaking points. When the person you are to protect is the same person you must kill to save humanity from extinction? Some choices are meant for gods as humans are too weak and unequipped to handle such traumatic experiences. One man's quest to solve God's Dilemma, but at what cost? One lady's quest to clear her name and enjoy life like every woman out there, but with what is at stake will the evil regime turn a blind eye? And at what expense? On the edge of the seat from the word go. A MUST READ.

What if you had just learned that your days are about to come to an end? Would you quietly accept your destiny, or would you fight this one final battle? And what if the demons of your past disturb the delicate reconciliation you thought you had found? These are the questions facing John Kadel in "If only I could...", a simple story about love. This is not a romance. It is a tale of the true and lasting love each of us dreams about, the undeniable love only some of us find in a lifetime of searching. John Kadel is a stubborn, single old man with a colorful past and questions for which he has no answers. Not long after his doctor hands him a death sentence, John runs into someone from his past.

THEY ONLY CHANGED HIS NAME is a fictionalized presentation of selected biographical events in the life of Bernard E. Baumbach (1892-1981). It begins with an imaginative characterization of the circumstances that provoked his then unmarried father to emigrate from Germany in 1883 with an older brother. They dreamed of becoming wealthy in the developing oil fields of Northwestern Pennsylvania. When he was seventeen years old, Bernard ventured to Central California with Earl, a double-cousin. They, too, had dreamed of becoming wealthy. For them, it was to be as employees of The Standard Oil Company of California. Their adjustments to their new circumstances were eased because of the help provided by Bernard's older brother, Albert, who had made that same trip two years earlier. The story chronicles his life as he matured into manhood which, at first, was a foreign country. He grew up in a richly religious German neighborhood on the outskirts of Oil City, PA. was strange also because there were no wooded hills and rushing rivers. The desert-like weather was yet another contending factor and the culture of California that provoked individuality and independence was daunting. He joined the U.S. Marine Corps on May 22, 1918 and served as a corporal in the Shore Patrol in France for four months prior to the Armistice and for eight months following. Three months later, he married Cordulla Julia Charlotte Becker of Pasadena, CA. He continued with Standard Oil of California until his retirement while garnering an exemplary record for safety as a driller. The centerpiece of the story, however, is that of family: his family on 'Dutch Hill' in the Cornplanter Township in PA; Julia's family in Pasadena, CA; and Julia's and his family of five children in Anaheim, CA. The next book from Ben Orlin, the popular math blogger and author of the underground bestseller *Math With Bad Drawings*. *Change Is The Only Constant* is an engaging and eloquent exploration of the intersection between calculus and daily life, complete with Orlin's sly humor and wonderfully bad drawings. *Change is the Only Constant* is an engaging and eloquent exploration of the intersection between calculus and daily life, complete with Orlin's sly humor and memorably bad drawings. By spinning 28 engaging mathematical tales, Orlin shows us that calculus is simply another language to express the very things we humans grapple with every day -- love, risk, time, and most importantly, change. Divided into two parts, "Moments" and "Eternities," and drawing on everyone from Sherlock Holmes to Mark Twain to David Foster Wallace, *Change is the Only Constant* unearths connections between calculus, art, literature, and a beloved dog named Elvis. This is not just math for math's sake; it's math for the sake of becoming a wiser and more thoughtful human.

Founded in 1943, *Negro Digest* (later "Black World") was the publication that launched Johnson Publishing. During the most turbulent years of the civil rights movement, *Negro Digest/Black World* served as a critical vehicle for political thought for supporters of the movement.

*More Precisely* provides a rigorous and engaging introduction to the mathematics necessary to do philosophy. It is impossible to fully understand much of the most important work in contemporary philosophy without a basic grasp of set theory, functions, probability, modality and infinity. Until now, this knowledge was difficult to acquire. Professors had to provide custom handouts to their classes, while students struggled through math texts searching for insight. *More Precisely* fills this key gap. Eric Steinhart provides lucid explanations of the basic mathematical concepts and sets out most commonly used notational conventions.

Furthermore, he demonstrates how mathematics applies to many fundamental issues in branches of philosophy such as metaphysics, philosophy of language, epistemology, and ethics.

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping
- The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service

In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other
