

## International Business The Challenges Of Globalization 7th Edition

For a first course in international business at the undergraduate or M.B.A. Level. Section 1 discusses the nature of international business and the three environments in which an international businessperson works. Section II examines the important international organizations, the international monetary system and their input in business. Section III discusses the uncontrollable forces that make up the foreign environments and illustrates their effects on business practices. The final section deals with the functions of management and shows how managers deal with the uncontrollable forces. Trends and new directives of international companies are also treated.

Transnational business activities are important drivers of growth for developing and the least developed countries. However, they can also negatively impact the enjoyment of human rights. In some cases, multinational enterprises (MNEs) have even been accused of grave human rights abuses in the territory of the states where their subsidiaries operate. Since the parent companies of many MNEs are incorporated under the law of European states, those countries' domestic law and the European legal framework play a crucial role in establishing how their activities should be conducted – also throughout their supply chains – and which remedies will be available when corporate human rights violations occur. In recent years, the European Union, the Council of Europe and their Member States have been adopting policies and legislation to ensure respect for human rights by businesses and have developed a body of related case law. These legal instruments can be considered the European responses to the challenges posed at international-law level, and they constitute the focus of research of this book. Through its collected chapters – written by scholars and practitioners under the direction of the editor, Angelica Bonfanti – the book identifies the European solutions to the business and human rights international legal issues, provides an overall assessment of their effectiveness, and examines their potential evolution.

This is the first full account of how an influential form of commercial organization - the multinational enterprise - drove globalization and contributed to the making of the modern world. Robert Fitzgerald explores the major role of multinational enterprises in the events of world history, from the nineteenth century to the present, revealing how the growth of businesses that operated across borders contributed to an unprecedented worldwide transformation and deepening interdependence between countries. He demonstrates how international businesses shaped the economic development and competitiveness of nations, their politics and sovereignty, and the balance of power in international relations. The Rise of the Global Company uses the lessons of history to question prominent contemporary interpretations of multinationals and their consequences, and offers a truly wide-ranging survey of multinational enterprise, spanning two hundred years and five continents.

The development of international business and of globalization in every field of activity requires the interaction of individuals and groups with diverse cultural, religious, ethnic and social characteristics in different institutional contexts. Cross-cultural Challenges in International Management addresses the various difficulties that may impede smooth communication and cooperation of those involved in such interactions. It examines what types of resources are mobilized to overcome such difficulties. The cultural and societal challenges of international management must be considered at different levels, the one of strategy, which the first part of the book is devoted to, but also that of management and business practices, addressed in the third part of the book. Both strategic decisions and daily business practices, however, in the particularly fluctuating and incompletely defined international context, gain from being framed by ethical and corporate social responsibility, which the second part of this book is devoted to. Cross-cultural Challenges in International Management provides an analysis of specific situations revealing such cultural or societal challenges. Thus, the reader will benefit not only from advanced theoretical knowledge in the field, but also from practical applications in various professional context and various countries. Practitioners, students in various fields of social sciences, particularly in management, communication, international relations, and researchers will widely benefit from this book.

This important and original book places the case study in international business research in its historical context, critically evaluates current case study practices in the field and proposes a more pluralistic future for case research within international business and international management research. While the case study is the most popular qualitative research strategy in the field, only a narrow selection of possible approaches is currently used. IB and IM researchers typically rely on a case study approach that could be characterized as 'qualitative positivism'. The editors and contributors look beyond this disciplinary convention and encourage greater pluralism in IB and IM case research. Their key argument is that increased awareness of prevailing disciplinary conventions - and their limitations - increases the potential for methodological innovation and versatility in case research. The contributions provide critical, novel and innovative perspectives on the case study in IB and IM research. The book offers inspiration to case authors and an authoritative methodological reference for those publishing and reviewing case research. It will also be highly regarded by postgraduate and doctoral students in IB and IM as well as both qualitative

and quantitative researchers in the field.

We live in a globally interconnected but economically divided world where internationally linked businesses can play a significant role in helping and/or obstructing the development of impoverished countries. Through a series of case studies, this volume examines what can be learned, both positively and critically, from the experiences of selected internationally connected firms in Nigeria, Uganda, Ghana, Vietnam, Guyana, and the Nunavik region of northern Canada. This book begins with a set of reflections on the strategies firms might adopt so that they develop both their own assets as well as those of the areas in which they operate. A team of more than two dozen researchers from the developed and developing countries conducted the research on which the essays on this and subsequent volumes are based. Dr Frederick Bird from Concordia University in Montreal directed the overall research project.
