This new edition is a comprehensive guide to clinical pathology for undergraduate medical students. Divided into three main sections, the text begins with discussion on clinical chemistry and other laboratory tests in the diagnosis and management of disease. Topics include function tests for urinal, renal and liver disorders, tests for diabetes, cerebrospinal fluid tests, and more. Section two covers blood tests for numerous disorders, and the third section discusses blood groups, their compatibility, screening, and transfusion. The second edition has been fully revised to provide the latest advances in the field. New topics in immunology, serology, flow cytometry and immunohistochemistry in haematology, have been added to this edition. The book is further enhanced by clinical photographs, pathology images and tables, and an appendices section covers the links between laboratory tests and findings with various diseases, reference ranges in adults, and critical values. Key points Comprehensive guide to clinical pathology for undergraduate medical students Fully revised, second edition featuring many new topics Includes detailed appendices for further learning Previous edition (9789380704197) published in 2010

This book established itself in its first edition as the definitive 'one-stop-shop' revision aid; the only one available to encompass all elements of the MRCOG Part 2 examination in a single volume. Now incorporating practice EMQs as well as the standard question types, this second edition will ensure that it retains its place on the 'must-have' list for every candidate preparing for this exam. Concentrating on testing the candidate's theoretical and practical knowledge as recommended in the current MRCOG syllabus, the book tests the trainee with questions in obstetrics and gynaecology and those aspects of medicine, surgery and paediatrics relevant to the practice of both. The book is divided into four key parts, one for each style of question, each of which opens with an introductory section on how to approach the exam and, crucially, how to fail it. # Part 1 provides a series of short answer practice papers. Common mistakes are highlighted as well as a list of key points required to get full marks. A sample answer is given for each question # Part 2 contains a mock paper for the MCQ part of the exam, containing 225 questions with answers and helpful annotations # Part 3 introduces the EMQ, giving the reader 40 questions in the style of the examination, together with answers and explanatory notes # Part 4 is devoted to the OSCE, with descriptions of 20 sample stations assessing different aspects of clinical practice, advice on how to tackle these, and suggested marking schemes. Throughout, questions have been designed to test factual knowledge and understanding, problem-solving ability, and clinical and communication skills. Designed to complement Robbins and Cotran Pathologic Basis of Disease, 9th Edition and Robbins Basic Pathology, 9th Edition, the full-color Robbins and Cotran Atlas of Pathology offers more than 1,500 outstanding illustrations that vividly

depict the most common diseases covered in pathology courses and USMLE exams. It's a quick visual reference or review for students and professionals alike. Previous editions of this book have proved indispensable for trainee surgeons preparing for the MRCS and AFRCS examinations. This extensively revised new edition is presented in a compelling new style and in a larger format. Beginning with a 'route-map' showing 'how to use this book', the text offers concise accounts of the core topics in pathology required of surgeons in training. There is particular emphasis on tissue pathology but full account is taken of relevant aspects of microbiology, haematology, immunology and clinical chemistry. Tables of normal laboratory values are included. Each major disorder is examined from the point of view of Cause, Structure, and Behaviour. Genetics, molecular biology and imaging receive balanced attention as do transfusion, telepathology and audit. The use of computers is outlined and suggestions given on access to Internet sources for learning purposes. The needs of trainees in countries outside Europe have been considered carefully. Illustrations have been selected to provide a clear, pictorial account of complex points. The inclusion of biographies of surgical pioneers adds interest and enables candidates to put their knowledge into context. A special feature is a series of marginal 'signposts' in the form 'Now Read' that take candidates to interrelated topics quickly and easily. There is extensive cross-referencing and a comprehensive index. This book is an invaluable guide for pathology trainees preparing for the FRCPath Part 1 examination (UK). The book contains 625 multiple choice questions of single best answer and extended matching type; organized into 5 mock examinations. Answers and explanations are supplied for each question. The question style and standard are at the level of the FRCPath Pt 1 examination. Intensive care medicine is a dynamic and evolving specialty, requiring its practitioners to be part physician, physiologist and anaesthetist. This requires a firm foundation of knowledge and an ability to apply this to the clinical situation. This book contains 270 multiple-choice questions allowing self-assessment of the breadth of knowledge required of the modern intensivist. The book is divided into three papers each consisting of 60 multiple true false (MTF) and 30 single best answer (SBA) questions covering areas including resuscitation, diagnosis, disease management, organ support, and ethical and legal aspects of practice. The MTF questions test factual knowledge and understanding of the evidence base underpinning intensive care medicine, while the SBA questions test the ability of the candidate to prioritise, compete options and make the best decision for the patient. Each question

is peer reviewed and accompanied by concise and detailed explanatory notes with references to guide further reading. All the authors are practising intensive care physicians with firsthand experience of professional examinations in the specialty. This book will appeal to intensive care physicians approaching professional examinations worldwide, including the European Diploma, American Board and Faculty of Intensive Care Medicine examinations. In addition, it will appeal to intensive care nurses and allied healthcare professionals wishing to update their knowledge as part of continuing professional development, and to physicians sitting professional examinations in related specialties requiring knowledge of intensive care medicine such as general medicine, general surgery and anaesthesia. This new book will complement the existing international best-selling title 'Multiple Choice Questions in Intensive Care Medicine' (ISBN 978 1 903378 64 9), also written by Dr Steve Benington.

This new edition offers up-to-date, clinically relevant board-style questions that are perfect for course review and board prep. Approximately 1,000 multiple-choice questions with detailed answer explanations cover frequently tested topics in general and systemic pathology.
