A groundbreaking history of the political ideas that made modern India *Violent Fraternity* is a major history of the political thought that laid the foundations of modern India. Taking readers from the dawn of the twentieth century to the independence of India and formation of Pakistan in 1947, the book is a testament to the power of ideas to drive historical transformation. Shruti Kapila sheds new light on leading figures such as M. K. Gandhi, Muhammad Iqbal, B. R. Ambedkar, and Vinayak Savarkar, the founder of Hindutva, showing how they were innovative political thinkers as well as influential political actors. She also examines lesser-known figures who contributed to the making of a new canon of political thought, such as B. G. Tilak, considered by Lenin to be the "fountainhead of revolution in Asia," and Sardar Patel, India's first deputy prime minister. Kapila argues that it was in India that modern political languages were remade through a revolution that defied fidelity to any exclusive ideology. The book shows how the foundational questions of politics were addressed in the shadow of imperialism to create both a sovereign India and the world's first avowedly Muslim nation, Pakistan. *Fraternity* was lost only to be found again in violence as the Indian age signaled the emergence of intimate enmity. A compelling work of scholarship, *Violent Fraternity* demonstrates why India, with its breathtaking scale and diversity, redefined the nature of political violence for the modern global era.

In this Hugo Award-winning alternative history classic—the basis for the Amazon Original series—the United States lost World War II and was subsequently divided between the Germans in the East and the Japanese in the West. It's America in 1962. Slavery is legal once again. The few Jews who still survive hide under assumed names. In this world, we meet characters like Frank Frink, a dealer of counterfeit Americana who is himself hiding his Jewish ancestry; Nobusuke Tagomi, the Japanese trade minister in San Francisco, unsure of his standing within the bureaucracy and Japan's with Germany; and Juliana Frink, Frank's ex-wife, who may be more important than she realizes. These seemingly disparate characters gradually realize their connections to each other just as they realize that something is not quite right about their world. And it seems as though the answers might lie with Hawthorne Abendsen, a mysterious and reclusive author, whose best-selling novel describes a world in which the US won the War... *The Man in the High Castle* is Dick at his best, giving readers a harrowing vision of the world that almost was. "The single most resonant and carefully imagined book of Dick's career." —New York Times

"In Asia, English is no longer a foreign language but a key resource for education, government, business and the general public. Whereas thirty years ago, British and American experts believed that the best way to improve the quality of English teaching was to cancel any programs below the secondary level, Asian nations as well as European are now introducing English in primary school. But there are major obstacles to overcome: the training of enough local teachers or the hiring of English speakers, the preparation of suitable teaching materials, the development of useful tests, and the design of workable curriculums. The chapters in this book, written by leading English-teaching professionals in seven Asian countries and originally delivered at the 2010 annual conference of Asia TEFL which took place in Hanoi, Vietnam, describe and analyze national policies and how they are implemented. The coverage is wide: China with its huge number of students learning English, Japan working to make the transition from elementary to secondary school seamless, Singapore continuing to use English as medium of instruction for its multilingual population, Korea developing English education policies to recognize the increased role of English alongside the national language, India building on its colonial past to make English an economic resource, Vietnam fitting English into a program of national rebuilding, and Taiwan spreading its English teaching outside the national capital. This is not a report of the views of outside experts, but of local experiences understood by local scholars of international standing. Policy makers, educators, researchers and scholars will be able to gain valuable insights from Asian experts"--
