Reading this book will make you less sure of yourself—and that's a good thing. In *The Invisible Gorilla*, Christopher Chabris and Daniel Simons, creators of one of psychology's most famous experiments, use remarkable stories and counterintuitive scientific findings to demonstrate an important truth: Our minds don't work the way we think they do. We think we see ourselves and the world as they really are, but we're actually missing a whole lot. Chabris and Simons combine the work of other researchers with their own findings on attention, perception, memory, and reasoning to reveal how faulty intuitions often get us into trouble. In the process, they explain:

- Why a company would spend billions to launch a product that its own analysts know will fail
- How a police officer could run right past a brutal assault without seeing it
- Why award-winning movies are full of editing mistakes
- What criminals have in common with chess masters
- Why measles and other childhood diseases are making a comeback
- Why money managers could learn a lot from weather forecasters

Again and again, we think we experience and understand the world as it is, but our thoughts are beset by everyday illusions. We write traffic laws and build criminal cases on the assumption that people will notice when something unusual happens right in front of them. We're sure we know where we were on 9/11, falsely believing that vivid memories are seared into our minds with perfect fidelity. And as a society, we spend billions on devices to train our brains because we're continually tempted by the lure of quick fixes and effortless

self-improvement. The Invisible Gorilla reveals the myriad ways that our intuitions can deceive us, but it's much more than a catalog of human failings. Chabris and Simons explain why we succumb to these everyday illusions and what we can do to inoculate ourselves against their effects. Ultimately, the book provides a kind of x-ray vision into our own minds, making it possible to pierce the veil of illusions that clouds our thoughts and to think clearly for perhaps the first time.

From the author of the beloved #1 national bestseller *Crow Lake* comes an exceptional new novel of jealousy, rivalry and the dangerous power of obsession. Two brothers, Arthur and Jake Dunn, are the sons of a farmer in the mid-1930s, when life is tough and another world war is looming. Arthur is reticent, solid, dutiful and set to inherit the farm and his father's character; Jake is younger, attractive, mercurial and dangerous to know – the family misfit. When a beautiful young woman comes into the community, the fragile balance of sibling rivalry tips over the edge. Then there is Ian, the family's next generation, and far too sure he knows the difference between right and wrong. By now it is the fifties, and the world has changed—a little, but not enough. These two generations in the small town of Struan, Ontario, are tragically interlocked, linked by fate and community but separated by a war which devours its young men—its unimaginable horror reaching right into the heart of this remote corner of an empire. With her astonishing ability to turn the ratchet of tension slowly and delicately, Lawson builds their story to a shocking climax. Taut with apprehension, surprising us with moments of tenderness and humour, *The Other Side of the Bridge* is a compelling, humane and vividly

perpetrator, while tracing the lasting effects of war through several generations. In March 1942, Mieke Eerkens' father was a ten-year-old boy living in the Dutch East Indies. When the Japanese invaded the island he, his family, and one hundred thousand other Dutch civilians were interned in a concentration camp and forced into hard labor for three years. After the Japanese surrendered, Mieke's father and his family were set free in a country that plunged immediately into civil war. Across the globe in the Netherlands, police carried a crying five-year-old girl out of her home at war's end, abandoned and ostracized as a daughter of Nazi sympathizers. This was Mieke's mother. She would be left on the street in front of her sealed home as her parents were taken away and imprisoned in the same camps where the country's Jews had recently been held. Many years later, Mieke's parents met, got married, and moved to California, where she and her siblings were born. While her parents lived far from the events of their past, the effects of the war would continue to be felt in their daily lives and in the lives of their children. All Ships Follow Me moves from Indonesia to the Netherlands to the United States, and spans generations, as Mieke recounts her parents' lives during and just after the war, and travels with them in the present day to the sites of their childhood in an attempt to understand their experiences and how it formed them. All Ships Follow Me is a deeply personal, sweeping saga of the wounds of war, and the way trauma can be passed down through generations.

when women were considered unfit to be foreign reporters, Frankie, Catherine, and Kate challenged the rules imposed on them by the military, ignored the belittlement of their male peers, and ultimately altered the craft of war reportage for generations. In *You Don't Belong Here*, Elizabeth Becker uses these women's work and lives to illuminate the Vietnam War from the 1965 American buildup, the expansion into Cambodia, and the American defeat and its aftermath. Arriving herself in the last years of the war, Becker writes as a historian and a witness of the times. What emerges is an unforgettable story of three journalists forging their place in a land of men, often at great personal sacrifice. Deeply reported and filled with personal letters, interviews, and profound insight, *You Don't Belong Here* fills a void in the history of women and of war. As mysterious as its beautiful, as forbidding as it is populated with warm-hearted people, Syberia is a land few Westerners know, and even fewer will ever visit. Traveling alone, by train, boat, car, and on foot, Colin Thubron traversed this vast territory, talking to everyone he encountered about the state of the beauty, whose natural resources have been savagely exploited for decades; a terrain tainted by nuclear waste but filled with citizens who both welcomed him and fed him—despite their own tragic poverty. From Mongolia to the Arctic Circle, from Rasputin's village in the west through tundra, taiga, mountains, lakes, rivers, and finally to a derelict Jewish community in the country's far eastern reaches, Colin Thubron penetrates a little-understood part of the world in a way that no writer ever has.

Tourism, fast becoming the largest global business, employs one out of twelve persons and produces \$6.5 trillion of the world's economy. In a groundbreaking book, Elizabeth Becker uncovers how what was once a hobby has become a colossal enterprise with profound impact on countries, the environment, and cultural heritage. This invisible industry exploded at the end of the Cold War. In 2012 the number of tourists traveling the world reached one billion. Now everything can be packaged as a tour: with the high cost of medical care in the U.S., Americans are booking a vacation and an operation in countries like Turkey for a fraction of the cost at home.
