The hospitality model called "Albergo Diffuso" (AD), or "scattered hotel," has been engineered by Mr Giancarlo Dall'Ara and described by The New York Times as a way of bringing life back to historic towns and rural hamlets by utilizing unused rooms for tourism. This "simple but genial" model devised in Italy in the mid-90's received an award from the UNDP for its sustainability, but despite the spread of AD's, no peer-reviewed books have previously been published in English focusing on this innovation. In this book, the author therefore begins by exploring the AD as a community-based hospitality model, examining both its pros and cons. He then considers conviviality, sense of security, and other factors that Hans Magnus Enzensberger referred to as luxuries of our time for urban dwellers. These represent the key pre-requisites a location must possess to be deemed suitable for this innovation. Next, investors and co-interested private, public and not-for-profit associations are provided with a structured framework to help them achieve a defensible competitive advantage by harnessing the economic potential of valuable, rare, inimitable and non-substitutable (VRIN) resources. The final section assesses the AD as a business model, evaluating various aspects at the heart of any business plan.

Since the end of World War II, social science research has become increasingly quantitative in nature. A Case for the Case Study provides a rationale for an alternative

File Type PDF Partnership Pubblico Privato In Sanit Esperienze E Risultati

to quantitative research: the close investigation of single instances of social phenomena. The first section of the book contains an overview of the central methodological issues involved in the use of the case study method.

Then, well-known scholars describe how they undertook case study research in order to understand changes in church involvement, city life, gender roles, white-collar crimes, family structure, homelessness, and other types of social experience. Each contributor confronts several key questions: What does the case study tell us that other approaches cannot? To what extent can one generalize from the study of a single case or of a highly limited set of cases? Does case study work provide the basis for postulating broad principles of social structure and behavior? The answers vary, but the consensus is that the opportunity to examine certain kinds of social phenomena in depth enables social scientists to advance greatly our empirical understanding of social life. The contributors are Leon Anderson, Howard M. Bahr, Theodore Caplow, Joe R. Feagin, Gilbert Geis, Gerald Handel, Anthony M. Orum, Andree F. Sjoberg, Gideon Sjoberg, David A. Snow, Ted R. Vaughan, R. Stephen Warner, Christine L. Williams, and Norma Williams.

The Companion to Historiography is an original analysis of the moods and trends in historical writing throughout its phases of development and explores the assumptions and procedures that have formed the creation of historical perspectives. Contributed by a distinguished panel of academics, each essay conveys in direct, jargon-free language a genuinely international, wide-angled view of the ideas, traditions and institutions that lie

behind the contemporary urgency of world history. In *Ancient Marbles in Naples in the Eighteenth Century* Eloisa Dodero aims at documenting the history of numerous private collections formed in Naples during the 18th century, with particular concern for the “Neapolitan marbles” and the circumstances of their dispersal.

In *Disaster Management and International Space Law* Diego Zannoni offers a systematic analysis of the main legal issues involved in both preventive measures regarding disasters and their relief phase, with a special focus on major space applications.

Smuggling the Renaissance: The Illicit Export of Artworks Out of Italy, 1861-1909 explores the phenomenon of art spoliation in Italy following Unification (1861), when the international demand for Italian Renaissance artworks was at an all-time high but effective art protection legislation had not yet been passed. Making use of rich archival material Joanna Smalcerz narrates the complex and often dramatic struggle between the lawmakers of the new Italian State, and international curators (e.g., Wilhelm Bode), collectors (e.g., Isabella Stewart Gardner) and dealers (e.g., Stefano Bardini) who continuously orchestrated illicit schemes to export abroad Italian masterpieces. At the heart of the intertwinement of the art trade, art scholarship and art protection policies the author exposes the socio-psychological dynamics of unlawful collecting.

This book sheds new light on the role of the military in Italian society and culture during war and peacetime by

bringing together a whole host of contributors across the interdisciplinary spectrum of Italian Studies. Divided into five thematic units, this volume examines the continuous and multifaceted impact of the military on modern and contemporary Italy. The Italian context offers a particularly fertile ground for studying the cultural impact of the military because the institution was used not only for defensive/offensive purposes, but also to unify the country and to spread ideas of socio-cultural and technological development across its diverse population.

The Lynx and the Telescope challenges the traditional interpretation of a programmatic convergence between the visions of Galileo and Cesi's Academy, while offering a new interpretation of the dynamics that led to the condemnation of Galileo in 1633.

Emerging forms of alternative economic frameworks are changing the structure of society, redefining the relationship between centre and periphery, and the

social dynamics in the urban fabric. In this context, the arts can play a crucial role in formulating a concept of complex and plural citizenship: This economic, social and cultural paradigm has the potential to overcome the conventional isolation of the arts and culture in ivory towers, and thereby to gradually make the urban fabric more fertile. This volume faces such sensitive issues by collating contributions from various disciplines: Economists, sociologists, urbanists, architects and creative artists offer a broad and deep assessment of urban dynamics and their visions for the years to come. [Italiano]: Uno dei principali requisiti per il buon funzionamento delle città, e per la loro sostenibilità, è che esse siano dotate di strade e spazi pubblici sicuri. Tale circostanza è ribadita dagli obiettivi di sviluppo sostenibile dell'Agenda 2030, in particolare dal Goal 11 con il quale si promuove la creazione di città sicure, oltre che inclusive, resilienti e sostenibili. La sicurezza in città è ostacolata quotidianamente dal verificarsi di reati predatori o episodi di inciviltà che condizionano la percezione di insicurezza innalzando la paura. La crescente domanda di sicurezza avanzata dai cittadini impone un cambio di prospettiva rispetto agli approcci sino ad ora adottati per far fronte a tale problematica. L'obiettivo di rendere la città più sicura non può essere perseguito esclusivamente con azioni di controllo o di tipo repressivo o con sporadici e generalizzati interventi di matrice sociale. È necessario affrontare la problematica in una prospettiva multidisciplinare e multilivello, seguendo un approccio integrato che inglobi in sé considerazioni, competenze, strategie

ed azioni di natura urbanistica, architettonica, sociologica, criminologica, giuridica e politica. Alla luce di quanto osservato, la raccolta si configura come occasione per riflettere, in maniera più attenta, su una tematica di particolare complessità, integrando saperi e punti di vista differenti che possano guidare l'urbanistica verso la predisposizione di azioni specifiche, eventualmente da poter contemplare nel Piano Urbanistico Comunale, per l'adeguamento, nel tempo, degli spazi urbani a criteri di sicurezza./[English]: One of the main requirements for well-functioning cities, and for their sustainability is that they have secure streets and public spaces. This circumstance is reaffirmed by the Sustainable Development Goals (SDG), in particular SDG 11 by which the creation of secure, as well as inclusive, resilient and sustainable cities is promoted. Security in the city is hindered everyday by the occurrence of predatory crimes or incivility episodes that affect the perception of insecurity raising fear. The growing demand for security that citizens ask for requires a new perspective with respect to the approaches that have been adopted so far to deal with this problem. The objective of making the city safer cannot be pursued exclusively through control or repressive actions or with occasional and generalised social interventions. It is necessary to address the issue in a multidisciplinary and multi-level perspective,

following an integrated approach that incorporates considerations, abilities, strategies and actions of an urban planning, architectural, social, criminological, legal and political nature. This collection is an opportunity to reflect, in a more careful way, on a particularly complex issue, integrating different knowledge and points of view that can guide Urban Planning towards the preparation of specific actions, possibly to be included in the Municipal Urban Plan, for the adaptation, over time, of urban spaces to security criteria.

This book addresses the topic of urban models with reference to large western cities and particularly to global cities. In the current transitional phase, the use of language and the systematization of phenomena has become important. The book's matrix examines two important and strongly connected themes: urban models and public-private

partnerships (PPP) determined by urban functions which are transformed in an increasingly rapid and complex manner as a result of globalization. PPPs represent the new border of the modern global state. The book focuses on two principal urban models (renewal and restructuring) through PPPs and subsequently the relationship between state and market in fourteen Italian cities (renewal) and two central European cities, Leipzig and Budapest (restructuring). CoUrbIT (Complex Urban Investment Tools) and the book 'Globalization and Urban Implosion: Creating New Competitive Advantage' by the same author serve as points of reference.

This report is structured in five parts: national framework for traditional and complementary medicine (T&CM); product regulation; practices and practitioners; the challenges faced by countries; and, finally, the country profiles. Apart from the section on practices and practitioners, the report is consistent with the format of the report of the first global survey in order to provide a useful comparison. The section on practices and practitioners, which covers providers, education and health insurance, is a new section incorporated to reflect the emerging trends in T&CM and to gather new information regarding these topics at a national level. All new information received has been incorporated into individual country profiles and data graphs. The report captures the three phases of progress made by Member States; that is, before and after the first WHO Traditional Medicine Strategy (1999-2005), from the first global survey to the second global survey (2005-2012) and from the second survey to the most recent timeline (2012-2018).

Il sistema del verde viene oggi riproposto in alcuni piani urbanistici più recenti secondo un disegno di struttura caratterizzato dalla continuità e dal paradigma reticolare; esso è utilizzato come componente primaria di un'operazione di riqualificazione ed integrazione della città consolidata e della città contemporanea caratterizzata dalla diffusione insediativa. La ricerca indaga su: i nuovi significati attribuiti al verde urbano con l'impiego del paradigma reticolare continuità/integrazione; il ruolo che questo può assumere quale strumento di riqualificazione ed integrazione urbana, a partire dal riutilizzo degli open space in dismissione e degli spazi residuali; la reale fattibilità ed efficacia, insieme ai limiti, delle tesi generali e delle sperimentazioni progettuali proposte o avviate su questi temi. Il campo di approfondimento è offerto dalle tesi sulla riqualificazione urbana di Rogers e dal dibattito e le riforme da queste suscitato che hanno determinato l'impostazione del Nuovo Piano di Londra (2003) e dalle prime sperimentazioni progettuali avviate per la riqualificazione di parti della città. Il percorso consente di verificare l'applicabilità di queste tesi alla riqualificazione della città europea. Le motivazioni ed il campo problematico della ricerca prendono le mosse dal considerare la larga disponibilità nella città contemporanea, insieme alle grandi aree di dismissione, di aree e spazi minori residuali del processo insediativo; come queste aree siano riconducibili a tipologie e fattori assai diversi, come esse siano oggetto di usi impropri o inadeguati; infine come i comportamenti ricorrenti nella progettazione tendano a trascurare o ignorare questi residui o ad utilizzarli in una visione frammentata dello spazio pubblico e del verde. Recenti esperienze hanno dimostrato come questi spazi ed aree residue possano essere oggetto di una strategia più complessiva per la riqualificazione della città contemporanea.

Roman Frugality offers the first-ever systematic analysis of

the variants of individual and collective self-restraint that shaped ancient Rome throughout its history and had significant repercussions in post-classical times. In particular, it tries to do the complexity of a phenomenon justice that is situated at the interface of ethics and economics, self and society, the real and the imaginary, and touches upon thrift and sobriety in the material sphere, but also modes of moderation more generally, not least in the spheres of food and drink, sex and power. Adopting an interdisciplinary approach drawing on ancient history, philology, archaeology and the history of thought, the volume traces the role of frugal thought and practice within the evolving political culture and political economy of ancient Rome from the archaic age to the imperial period and concludes with a chapter that explores the reception of ancient ideas of self-restraint in early modern times.

Ongaro has made a major contribution to understanding the political and administrative systems of Southern Europe. The work goes beyond that, however, by providing an excellent example of comparative analysis in general. This book should be read by all students of comparative administration. B. Guy Peters, University of Pittsburgh, US and City University of Hong Kong This is an important book for several reasons. Public sector reform debates and policies have been heavily perhaps too heavily influenced by Anglo-Saxon models, and literature on reforms in the Latin part of Europe has, until now, only been available in a fragmented way. However, this unique new book offers a coherent vision across Southern Europe. It refers to important parts of our history and how these still influence current times. It also shows that culture does make a difference, and that contingencies are important. European public sector reform is as diverse as the range of its administrative histories, and this book is therefore crucial in our understanding of the future in relation to the

past. Geert Bouckaert, Public Management Institute, Katholieke Universiteit Leuven, Belgium, and European Group for Public Administration This systematic, thorough and insightful book offers one of the very rare comparative studies of public management reform in Italy, France, Greece, Portugal and Spain. A unique and most valuable study. Walter Kickert, Erasmus University Rotterdam, the Netherlands Scholars of public management reform have been at it for many years but there was always a gap little was really known about southern Europe, those countries that come from the Napoleonic tradition. Now, Professor Edoardo Ongaro of Bocconi University has filled that gap, and we will all profit from his diligent and insightful work. Jeffrey D. Straussman, Nelson A. Rockefeller College of Public Affairs and Policy, University at Albany, US Theoretically eclectic and empirically rich, this is a much-needed volume on the dark side of the moon, that is, public management reform outside the Anglo-Saxon world. Edoardo Ongaro sheds light on Italy and four other Napoleonic systems by producing a far-reaching comparative analysis that also captures the effects of Europeanization and multi-level governance on public management reforms. Ambitious yet ultimately accessible, this book is a must-read for those who want to explain and understand the trajectories of reform in their historical context. Claudio Radaelli, University of Exeter, UK The reader will find in Professor Ongaro s book a clear and thorough discussion of the public sector reform process both in Italy and southern European countries based upon a systematic comparative framework. This is a very useful and original work that any student in comparative politics or public administration will highly appreciate. Luc Rouban, CNRS, Centre de Recherches Politiques de Science Po (CEVIPOF), Paris, France This scholarly volume makes an interesting and distinctive contribution to the global public management

reform debate by offering an analysis of reform trajectories in an important but rather neglected group of Southern European countries. Ewan Ferlie, King's College London, UK Since the 1980s, a wave of reforms of public management has swept the world. The investigation into the effects of such major transformations has, however, been unbalanced: important countries have received only limited attention. This timely book fills the gap by investigating the dynamics of contemporary public management reform in five European countries that gave shape to the Napoleonic administrative tradition France, Greece, Italy, Portugal, Spain. Edoardo Ongaro presents an in-depth investigation of the reform of public management in these countries, revisiting major topics of theoretical interest in the study of public administration. He addresses key issues regarding the influence of the past on the transformation of the public se

"Machiavelli is known chiefly for *The Prince*, but his main considerations on politics are in his most profound and later work *Discourses on Livy*, the complexity, length and style of which have often discouraged new readers and interpreters of Machiavelli, despite its historical and theoretical importance. For this reason, the *Discourses* has not been given the attention it deserves. This volume of newly commissioned essays by some of the world's leading experts on Machiavelli overcomes this gap. It is the first collective volume dedicated specifically to this work, ranging over topics such as Machiavelli's republicanism, the relation between liberty and tyranny, the role of religion, his conception of history, his writing style, his view of society as a plural and conflictive body, his suggestion of how a free state should be organized, or his notions of the people and virtù. An examination of whether there is a legally independent 'principle of humanity' in international humanitarian law.

In tutte le societ avanzate, la sanit si colloca pi sul versante dello stato e delle scelte collettive che su quello del mercato e degli interessi particolari. Gli approcci di governance (contrapposti a quelli di government) suggeriscono ai soggetti pubblici di abbandonare l'idea che le scelte collettive possano essere realizzate attraverso il solo esercizio di poteri sovraordinati. Si tratta, invece, di guardare a sistemi complessi, siano essi tutta la sanit o una azienda sanitaria pubblica, nella prospettiva di un ordine che deve essere conquistato o fatto emergere e che non pu pi essere imposto. Con queste premesse il libro guarda alla sanit nel nostro Paese, collocando il SSN nel quadro del pi complessivo settore sanitario, considerato come il vasto insieme di soggetti pubblici e privati coinvolti nei processi attraverso i quali individui e collettivit fruiscono di servizi e prestazioni che attengono ai bisogni di salute. La governance all'interno del SSN viene, successivamente, interpretata alla luce del modello aziendale, quale ipotesi principale attorno alla quale si sono costruite le relazioni che legano i livelli regionali alle aziende sanitarie, modello che sembra ora essere messo in discussione e che necessita di essere difeso. Da ultimo sono considerate le strutture e gli assetti di governo a livello aziendale, rispetto ai quali emergono spinte crescenti volte ad assicurare una maggiore collegialit, preservando al contempo la necessaria efficienza e unitariet dei

Il presente "Manuale di Medicina Necroscopica" vuole essere una guida pratica per il medico curante (MMG o PLS) operante nella Regione Toscana, con il fine di supportarlo nell'espletamento dei propri compiti al momento del decesso di un suo assistito. Il testo, facilmente consultabile, oltre ad illustrare le nozioni base di Medicina Necroscopica, con i relativi riferimenti legislativi, fornisce un quadro delle certificazioni di competenza del Medico di Base, distinguendole da quelle del Medico Necroscopo e/o di altre figure coinvolte nell'evento decesso. Il testo offre inoltre i facsimile di modulistica utile nell'espletamento di questa attività, nonché indicazioni sulla compilazione delle varie certificazioni (esempi pratici sulla compilazione della Scheda ISTAT sulle cause di morte, ecc.).

Economic growth and the creation of wealth have cut global poverty rates, yet vulnerability, inequality, exclusion and violence have escalated within and across societies throughout the world. natural disasters. Moreover, while we have strengthened international human rights frameworks over the past several decades, implementing and protecting these norms remains a challenge. These changes signal the emergence of a new global context for learning that has vital implications for education. Rethinking the purpose of education and the organization of learning has never been more urgent. This book is inspired by a humanistic vision of education and development, based on respect for life and human dignity, equal rights, social justice, cultural diversity, international solidarity and shared responsibility for a sustainable future.

There have been extraordinary developments in the field of neuroscience in recent years, sparking a number of discussions within the legal field. This book studies the various interactions between neuroscience and the world of law, and explores how neuroscientific findings could affect some fundamental legal categories and how the law should be implemented in such cases. The book is divided into three main parts. Starting with a general overview of the convergence of neuroscience and law, the first part outlines the importance of their continuous interaction, the challenges that neuroscience poses for the concepts of free will and responsibility, and the peculiar characteristics of a “new” cognitive liberty. In turn, the second part addresses the phenomenon of cognitive and moral enhancement, as well as the uses of neurotechnology and their impacts on health, self-determination and the concept of being human. The third and last part investigates the use of neuroscientific findings in both criminal and civil cases, and seeks to

determine whether they can provide valuable evidence and facilitate the assessment of personal responsibility, helping to resolve cases. The book is the result of an interdisciplinary dialogue involving jurists, philosophers, neuroscientists, forensic medicine specialists, and scholars in the humanities; further, it is intended for a broad readership interested in understanding the impacts of scientific and technological developments on people's lives and on our social systems.
