Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation. Accounts of the relationships between states and terrorist organizations in the Cold War era have long been shaped by speculation, a lack of primary sources and even conspiracy theories. In the last few years, however, things have evolved rapidly. Using a wide range of case studies including the British State and Loyalist Paramilitaries in Northern Ireland, as well as the United States and Nicaragua, this book sheds new light on the relations between state and terrorist actors, allowing for a fresh and much more insightful assessment of the contacts, dealings, agreements and collusion with terrorist organizations undertaken by state actors on both sides of the Iron Curtain. presents the current state of research and provides an assessment of the nature, motives, effects, and major historical shifts of the relations between individual states and terrorist organizations. The articles collected demonstrate that these state-terrorism relationships were not only much more ambiguous than much of the older literature had suggested but are, in fact, crucial for the understanding of global political history in the Cold War era.

This volume establishes a clear link between good nutrition and high productivity. It demonstrates that ensuring that workers have access to nutritious, safe and affordable food, an adequate meal break and decent conditions for eating is not only socially important and economically viable but a profitable business practice too. Through case studies from a variety of enterprises in 28 industrialized and developing countries, the book offers valuable and practical food solutions which can be adapted to workplaces of different sizes and with different budgets. It also addresses an often-overlooked issue in nutrition: access to clean drinking water. Relevant laws, regulations and guides pertaining to meal breaks and workplace nutrition are also highlighted in this volume, and an extensive section containing checklists and other useful resources for unions, employers and governments is included.

Fiat's first agricultural tractor was presented to the civil and military authorities of

Turin in 1918 and marketed the following year by the Federation of Agricultural Consortia.
