From the bestselling author of *Burying the Honeysuckle Girls* comes a riveting novel about a mother and daughter separated by grief, secrets, and a conspiracy that threatens to destroy their lives. If there's a healthy way to grieve, Erin Gaines hasn't found it. After her husband's sudden death, the runaway success of the tech company they built with their best friends has become overwhelming. Her nerves are frayed, she's disengaged, and her frustrated daughter, Shorie, is pulling away from her. Maybe Erin's friends and family are right. Maybe a few weeks at a spa resort in the Caribbean islands is just what she needs to hit the reset button... Shorie is not only worried about her mother's mental state but also for the future of her parents' company. Especially when she begins to suspect that not all of Erin's colleagues can be trusted. It seems someone is spinning an intricate web of deception--the foundation for a conspiracy that is putting everything, and everyone she loves, at risk. And she may be the only one who can stop it. Now, thousands of miles away in a remote, and oftentimes menacing, tropical jungle, Erin is beginning to have similar fears. Things at the resort aren't exactly how the brochure described, and unless she's losing her mind, Erin's pretty sure she wasn't sent

INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to thinking clearly about the world.” – Bill Gates “Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about

everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.
