With true expressions of remorse to my partners at Johns Hopkins University and in the Greater Baltimore region, I need to concede that I never knew much with regards to Harriet Lane, other than the way that her name is on the little book that for quite a long time has been my go-to asset when I'm searching for an extensive medication model or the most recent symptomatic and helpful data. Being somewhat of an easy chair history buff, I as of late heard that a lady named Harriet Lane filled in as the White House lady for single man President James Buchanan before the Civil War, and I thought, could they be very much the same?
