Piercing research goes beyond the usual arguments against genetic manipulation to show that better crops were never the issue. What bioengineering is really about is a new kind of total serfdom, where the entire world will be in thrall to the likes of Monsanto if they ever want to eat again. Author F. William Engdahl wrote the classic *A Century of War*, which exposed the hand of Anglo-American petropolitics and hegemonic ambition behind the horrors of the World Wars. Adolescence is recognised as a turbulent period of human development. Along with the physical changes of puberty, adolescents undergo significant transformations in the way they think, act, feel and perceive the world. The disruption that is manifest in their behaviour is upsetting and often incomprehensible to the adults surrounding them. In *The Adolescent Psyche* Richard Frankel shows how this unique stage of human development expresses through its traumas and fantasies the adolescent's urge towards self-realization. The impact of contemporary culture on the lives of young people has resulted in an increasing number of adolescents being referred for psychotherapy and psychiatric treatment. Successful outcomes are often difficult to achieve in clinical work with clients of this age-group. The advice and guidelines which Frankel provides will be welcomed by psychotherapists, parents, educators and anyone working with adolescents.
